Yiming Cao, Zsolt Lavicza , Shuhua An, Lianchun Dong, 2024-05-31 There is no doubt that the onset of a new decade has brought high expectations of academic progress for scholars especially for researchers in mathematics education The International Group for the Psychology of Mathematics Education was born in 1976 which focused on the international exchange of knowledge in the psychology of mathematics education the promotion of interdisciplinary research with psychologists mathematicians and mathematics teachers and the development of the psychological aspects of teaching and learning mathematics and its implications

Stability Assessment for Underground Excavations and Key Construction Techniques Hanhua Zhu, Mengchong Chen, Yu Zhao, Fusheng Niu, 2016-11-01 This book examines how the state of underground structures can be determined with the assistance of force deformation and energy It then analyzes mechanized shield methods the New Austrian tunneling method NATM and conventional methods from this new perspective The book gathers a wealth of cases reflecting the experiences of practitioners and administrators alike Based on statistical and engineering studies of these cases as well as lab and field experiments it develops a stability assessment approach incorporating a stable equilibrium which enables engineers to keep the structure and surrounding rocks safe as long as the stable equilibrium and deformation compliance are maintained The book illustrates the implementation of the method in various tunneling contexts including soil rock mixed strata tunneling beneath operating roads underwater tunnels and tunnel pit excavation It offers a valuable guide for researchers designers and engineers especially those who are seeking to understand the underlying principles of underground excavation

**Smart Big Data in Digital Agriculture Applications** Haoyu Niu, Yangquan Chen, 2024-02-28 In the dynamic realm of digital agriculture the integration of big data acquisition platforms has sparked both curiosity and enthusiasm among researchers and agricultural practitioners This book embarks on a journey to explore the intersection of artificial intelligence and agriculture focusing on small unmanned aerial vehicles UAVs unmanned ground vehicles UGVs edge AI sensors and the profound impact they have on digital agriculture particularly in the context of heterogeneous crops such as walnuts pomegranates cotton etc For example lightweight sensors mounted on UAVs including multispectral and thermal infrared cameras serve as invaluable tools for capturing high resolution images Their enhanced temporal and spatial resolutions

coupled with cost effectiveness and near real time data acquisition position UAVs as an optimal platform for mapping and monitoring crop variability in vast expanses This combination of data acquisition platforms and advanced analytics generates substantial datasets necessitating a deep understanding of fractional order thinking which is imperative due to the inherent complexity and consequent variability within the agricultural process Much optimism is vested in the field of artificial intelligence such as machine learning ML and computer vision CV where the efficient utilization of big data to make it smart is of paramount importance in agricultural research Central to this learning process lies the intricate relationship between plant physiology and optimization methods The key to the learning process is the plant physiology and optimization method Crafting an efficient optimization method raises three pivotal questions 1 What represents the best approach to optimization 2 How can we achieve a more optimal optimization 3 Is it possible to demand more optimal machine learning exemplified by deep learning while minimizing the need for extensive labeled data for digital agriculture This book details the foundations of the plant physiology informed machine learning PPIML and the principle of tail matching POTM framework It is the 9th title of the Agriculture Automation and Control book series published by Springer

**Planning, Operation and Control of Modern Power System with Large-scale Renewable Energy Generations, volume II** Youbo Liu,Hao Xiao,Xia Lei,Yaser Qudaih ,Xin Zhang,2024-08-13

The rapid development and utilization of renewable energy generations REGs such as wind power and photovoltaic power is an important measure for modern power system to achieve carbon neutrality and solve global energy crisis However the randomness and volatility of renewable energy generations lead to serious reliability concerns and financial risks to different decision makers and the large scale integration of power electronic brings huge challenges to the planning operation and control optimization of renewable energy based systems Therefore to achieve the integration of large scale renewable energy generations advanced planning operation and control optimization methods and strategies for modern power systems are required to be developed based on the state of the art power system technologies The aim of this Research Topic is to report the latest advancements in planning operation and control optimization of large scale renewable energy generations in modern power system to solve potential difficulties and challenges

**Damage Detection and Structural Health Monitoring of Concrete and Masonry Structures** Hashem Jahangir,Harish Chandra Arora,José Viriato Araújo Dos Santos,Krishna Kumar,Aman Kumar,Nishant Raj Kapoor,2025-03-21 This book offers the use of artificial intelligence image processing model analysis laser scanners shearography drones contourlet wavelet signal processing techniques and other SHM techniques to detect the damages in the concrete as well as masonry structures Corrosion is one major factor that causes reinforced concrete structures to deteriorate over time However the degrading process is not evenly distributed throughout the structure The damage can be detected timely and the structure s degradation model can be updated with the help of proper monitoring and inspection techniques The damages in the masonry structures may happen due to moisture ingress cracking mortar failure settlement and spalling etc Structure health monitoring SHM may assist in understanding the structures deterioration mechanisms and reducing the ongoing deterioration in a scientific manner A complete detail of both the traditional and cutting edge approaches used in the SHM process is described in this book The latest non destructive techniques and semi destructive techniques shall also be discussed in this book This book aids academics and industry professionals with recent developments in SHM techniques Additionally it encourages researchers in coming up with creation of newer applications in structural engineering
