Fundamentals of Gifted Education Carolyn M. Callahan, Holly L. Hertberg-Davis, 2013 The field of gifted education is characterized by a confusing array of perspectives concerning such fundamental issues as definition philosophy curriculum social and emotional development and underserved populations The mission of this book is to provide a coherent framework that instructors and service providers can use in planning effective programs providing appropriate counseling services and evaluating programs for the gifted Most sections are organized around fundamental issues confronting the field and follow a common structure an introductory chapter that provides historical and theoretical background and organizing questions followed by several point of view chapters written by experts that provide varied perspectives on the topic at hand

Distinguishing Features Comprehensive Coverage The book's forty-five manageable length chapters cover the full range of topics that must be considered in planning programs and services for gifted students both within and outside of school.

Coherent Structure Section introductions provide background information and organizing questions to guide chapter authors who provide varying views of the issue at hand. The emphasis is not on the right way or the wrong way except when clearly documented bad practice is discussed but on how best practice stems from well-informed and logical decision making.

Decision Making Focus The book's introductory chapter addresses the need for a clearly developed and consistently applied set of values to guide decision making. Likewise, each section introduction includes a decision making framework regarding some aspect of educating, counseling, or parenting gifted students. This book is appropriate for introductory level courses in gifted education or courses in program development and planning. It is also suitable for school personnel responsible for making program planning decisions in the area of gifted education and for academic libraries with holdings in this area.

Conceptions of Giftedness and Talent Robert J. Sternberg, Don Ambrose, 2020-12-18. This book brings together eminent and emerging scholars to present cutting edge research on diverse conceptions of giftedness and talent from a range of international perspectives. It covers classical views emphasizing IQ but also seeks to move the academic debate on from the common exclusive emphasis on IQ based skills. In each chapter the contributors address both theoretical advances and practical applications for administrators, teachers, and parents. The editors conclude by integrating the different points of view and showing ways in which major ideas, even when given different names, can be integrated to provide a holistic and integral viewpoint on giftedness and talent. This book will appeal to students and scholars of creativity, giftedness, and gifted education as well as to practitioners, teachers, and education policymakers.
