No Two Alike:

No Two Alike Keith Baker, 2014-11-04 Follows a pair of birds on a snowflake filled journey through a winter landscape where everything everywhere from branches and leaves to forests full of trees is unique *No Two Alike: Human Nature and Human Individuality* Judith Rich Harris, 2007-06-17 The author of the controversial book *The Nurture Assumption* tackles the biggest mystery in all of psychology What makes people differ so much in personality and behavior It can't just be nature and nurture because even identical twins who grow up together same genes same parents have different personalities And if psychologists can't explain why identical twins are different they also can't explain why each of us differs from everyone else Why no two people are alike Harris turns out to be well suited for the role of detective it isn't easy to pull the wool over her eyes She rounds up the usual suspects and shows why none of the currently popular explanations for human differences birth order effects for example or interactions between genes and environment can be the perpetrator she is looking for None of these theories can solve the mystery of human individuality The search for clues carries Harris into some fascinating byways of science The evidence she examines ranges from classic experiments in social psychology to cutting edge research in neuroscience She looks at studies of twins research on autistic children observations of chimpanzees birds and even ants Her solution is a startlingly original one the first completely new theory of personality since Freud's Based on a principle of evolutionary psychology the idea that the human mind is a toolbox of special purpose devices Harris's theory explains how attributes we all have in common can make us different This is the story of a scientific quest but it is also the personal story of a courageous and innovative woman who refused to be satisfied with what everyone knows is true *No Two Alike: Human Nature and Human Individuality* Judith Rich Harris, 2010-02-15 A display of scientific courage and imagination William Saletan New York Times Book Review Why do people even identical twins reared in the same home differ so much in personality Armed with an inquiring mind and insights from evolutionary psychology Judith Rich Harris sets out to solve the mystery of human individuality Genes and Surroundings Ronald G. Davidson, 1999-07-07 *The Trouble with Trauma* Michael Scheeringa, 2022-03-08 The Trouble with Trauma is the story of how the idea of psychological trauma appeals to the human mind Trauma impacts many people psychologically but the evidence on the long term physical effect is incomplete Theories that psychological trauma can permanently damage your brain cause physical disease and change your essential character have become staples of human thought worldwide Dr Scheeringa explains how those theories are widely believed whilst not being true and at the heart of the story is an explanation of how humans choose to ignore scientific evidence and practice self deception based on heuristics for survival Heuristics is a rapid and efficient method to make judgments about threatening situations which may be especially relevant during an epidemic and the spread of misinformation But The Trouble with Trauma is more than a critique of social policy This is a book for anyone who wants a better understanding on how groupthink and herd mentality works and improves our ability to understand scientific fact Dr Scheeringa sheds light on

why we choose to ignore scientific evidence while engaging the reader in a lively conversation on how we come to believe
