## THE MOUSE-TOWER

Long ago in Germany there lived a wicked ruler called Hatto. He was very cruel to his people, and made them pay high taxes so that he could be rich. One year, there was a very bad harvest in the surrounding country, and the shortage of food was made worse because Hatto had bought all the previous year's corn. The unhappy people begged him to lower the price of the corn in his storehouse, but it was in vain. His advisers begged him to have pity, but he refused.

One day a crowd of hungry beggars came to Hatto's palace crying for food. Hatto and his guests were just sitting down to a fine feast and Hatto told them he thought it would be a good thing to get rid of these beggars altogether. So when the ragged crowd of men, women and children came in and threw themselves at his feet, he greeted them with smile and promised them corn. They were led outside the town to a barn, where each one was to receive as much corn as he wished. They hurried on, full of gratitude, but when they were all in the barn Hatto ordered the doors to be locked and the barn to be set on fire. The screams of the poor people were terrible, and could be heard even in the ruler's palace. "listen!" cried Hatto. "The mice are squeaking in the corn."

Suddenly, thousands of mice came out of the burning barn. They ran to the palace and filled every room and corner. The more they were killed, the more they multiplied. Hatto was frightened. He realized that this was God's punishment, so he fled from the town and got into a boat hoping to escape to a tower that he had built in the middle of the river. But the mice swam after him in thousands, and when he reached the tower the mice followed him. They tore holes in the door with their sharp teeth, and at last reached him. The cruel man was eaten by the mice. The tower still stands in the middle of the River Rhine in Germany, and people call it the Mouse-Tower.

Language comprehension experts in cognitive psychology education and linguistics present alternative viewpoints concerning the issue of effective readability predictors. The long term result: new questions raised by the research in this book should help to make texts more comprehensible and to provide a theoretically sound model of language processing and interpretation.

**Journal of Developmental Education**, 1997 Supporting Early Career Teachers With Research-Based Practices Wellner, Laurie, Pierce-Friedman, Kathleen, 2021-05-21. Teachers in their first few years of their teaching career require high quality structured support to begin the journey towards becoming experts. Establishing research-based best practices and working habits set up early career teachers for a fulfilling and successful career. The requirements of teachers are constantly changing and teachers need to continually adapt their knowledge and practices to fit schools' changing demographics. Having a toolbox of research-based best practices to draw upon can support early career teachers as they move from theory to practical application when the learning curve is the steepest. Strengthening the system of support includes increasing teachers' influence over their day-to-day work and developing positive and supportive cultures of learning. *Supporting Early Career Teachers With Research-Based Practices* presents both theoretical and practical research to support the conceptual understanding of educational praxis for common areas with which early career educators may require additional expertise or support. This book is intended to be a valuable contribution to the body of literature in the field of education by supplying research-based teaching practices for modern
