**E-books in Libraries** Kate Price, Virginia Havergal, 2011 Despite the fact that e books have been in existence for decades in various guises and added to library collections for several years now there has been a noticeable lack of published manuals on the subject This is doubtless owing to the rapidly evolving nature of the market There is now a plethora of different types of digital object that may be termed e books and a bewildering number of business and access models to match Moreover the pace of change shows no sign of abating but there is an increasing amount of popular interest in e books and what is needed is practical information to assist library and information professionals managing collections of e books and doing their best to inform their users right now The book is divided into five parts The production and distribution of e books Planning and developing an e book collection Delivering e books to library readers Engaging readers with e books The future of e books Virginia Havergal BA Hons MSc MEd FIFL is a Learning Centres and e Resources Manager for Petroc a further education college in Devon Prior to this role she was an e Learning Advisor with JISC with a particular focus on Learning Resources Kate Price BA Hons MA MCLIP is Head of E Strategy and Resources at the University of Surrey
