The external power jack (PWR) lets you connect an external power DC power source (rechargeable or operation without batteries). Use field power, model 273-1466 for 120V AC, or model 148440 for 12V car cigarette lighter. (Mobile use of batteries may be unlawful or require a permit in some areas. Check with local authorities.)

The PAB Jack may be used in any time, with or without hot water, installed.

To recharge nickel-cadmium batteries in the receiver, simply plug an external BA with DC power source (Radio Shack 273-1455) into the recharge (CHG) jack. To fully charge nickel-cadmium, leave the external power connected for 10-18 hours.

## NOTE

- The recharger (CHG) jack is to be used only when nickel-cadmium batteries are installed. The unit can operate while nickel-cadmium batteries are being charged.
- Never connect external power to the charge jack when regular or alkaline batteries are installed, because charging can cause them batteries to explode.
- Remove external power from the CHG jack during a power failure.
