

Ohio's 7th Grade Social Studies Standards (Adopted 2010)

1. Historians and archaeologists describe historical events and issues from the perspectives of people living at the time to avoid evaluating the past in terms of today's values and beliefs.
2. The civilizations that developed in Greece and Rome had an enduring impact on later civilizations. This legacy included governance and law, engineering and technology, art, and architecture, as well as literature and history. The Roman Empire also played an instrumental role in the spread of Christianity.
3. The Roman Empire collapsed due to various internal and external factors (political, social and economic) which led to the development of feudalism and the manorial system in the region. The fall of Rome and later Byzantium also allowed for the creation of new empires in the region.
4. The Muslims conquered much of Asia which led to unified states in China and Korea. Muslim failure to conquer Japan allowed a feudal system to persist.
5. Achievements in medicine, science, mathematics and geography by the Islamic civilization dominated much of the Mediterranean after the decline of the Roman Empire. These achievements were introduced into Western Europe as a result of the Muslim conquests, Crusades and trade, influencing the European Renaissance.
6. The decline of feudalism, the rise of nation-states and the Renaissance in Europe introduced revolutionary ideas, leading to cultural, scientific and social changes.
7. The Reformation introduced changes in religion, including the emergence of Protestant faiths and a decline in the political power and social influence of the Roman Catholic Church.
8. Empires in Africa and Asia grew as commercial and cultural centers along trade routes.
9. The advent of the trans-Atlantic slave trade had profound effects on both West and Central Africa and the receiving societies.
10. European economic and cultural influence dramatically increased through exploration, conquests and colonization.
