WALNECK'S CLASSIC CYCLE TRADER, APRIL 2003 Causey Enterprises, LLC, Engine Design Concepts for World Championship Grand Prix Motorcycles Alberto Boretti, 2012-08-06. The World Championship Grand Prix WCGP is the premier championship event of motorcycle road racing. The WCGP was established in 1949 by the sport's governing body, the Fédération Internationale de Motocyclisme (FIM), and is the oldest world championship event in the motorsports arena. This book, developed especially for racing enthusiasts by motorsports engineering expert Dr. Alberto Boretti, provides a broad view of WCGP motorcycle racing and vehicles but is primarily focused on the design of four stroke engines for the MotoGP class. The book opens with general background on

MotoGP governing bodies and a history of the event's classes since the competition began in 1949. It then presents some of the key engines that have been developed and used for the competition through the years. Technologies that are used in today's MotoGP engines are discussed. A sidebar discussion on calculating brake indicated and friction performance parameters provides mathematical information for readers who like such technical details. Future developments of MotoGP engines including the use of biofuels and recovery of thermal and braking energy are presented. The introduction concludes with a chart that details the winners of the various classes of WCGP motorcycle racing since the competition began in 1949. The bulk of the book consists of four previously published SAE technical papers that were expressly chosen by Dr. Boretti to provide greater insight to the relationships between engine parameters and performance, namely the influence on friction and mean effective pressure of traditional spark-ignited four-stroke engines tuned for a narrow high-power output. The first paper provides the reader with a quick way to estimate the friction loss and engine output. The second paper discusses output and fuel consumption of multi-valve motorcycle engines. The third paper, published in 2002, compares WCGP engines developed to comply with the then new FIM regulations that allowed four-stroke engines in the competition. The fourth paper examines specific power densities and therefore the level of sophistication and costs of MotoGP 800 cm³ engines. This paper shows the performance of these as well as the 1000cc Superbike engines. The fifth paper presents four engine concepts including one for a MotoGP Superbike with 2 and 3 cylinders. The sixth paper compares 3 and 4 in-line V4, V5, and V6 layouts through 1-D engine simulations. The seventh paper considers the actual operation of 800cc MotoGP engines on the race track where the percentage of the duration in fully open throttle is less than 20% of the race, but the partial throttle is used for as much as 80% of the race. The final paper in the compendium reports on the Honda oval piston engine concept.

Car & Motorcycle Slang Lewis Poteet, 2000-07-24. Authors Lewis J. Poteet and Aaron C. Poteet, father and son, also wrote *Hockey Talk*, a dictionary of hockey slang. This book was born out of the son's lifelong fascination with police crime and justice and his father's love of language. Lewis has written or co-authored numerous slang word and phrase books including *Plane Talk*, *Car Talk*, and *The South Shore Phrase Book*. Lewis taught English for 32 years at Concordia University in Montreal and in winter 2000 was adjunct instructor in English at Austin TX Community College. Aaron holds a bachelor's degree in criminal justice from Northeastern University in Boston. As a sometime wayward youth, he walked the city streets at night as neighborhood patrol, Guardian Angel, even vigilante. His near-obsession with the street led to work in the most thankless profession known to man's law enforcement, and he loved almost every minute of it, working for the better part of a decade as a Special Police Officer in Boston and then briefly with the Austin Police Department. He now works for a large corporation in field collections. Gathered from live conversation and printed sources, this book presents the lively language of car and motorcycle fans, with entries also from car parts men, mechanics, car salesmen, and ordinary drivers. Drawn from California, Canada, Texas, Boston, England, Belize, and other places, it evokes the terror, the joy, the pride, the troubles that come from these Rube Goldbergish
