It is strongly recommended
that you follow these step-by-
step numbered instructions to
set up and quickly begin
using your new C-50 Zoom
Digital Camera.

START HERE

For more detailed instructions on advanced features, please refer to the printed Basic Manual included in your package, or the Reference Manual on the CD-ROM.

1 UNPACKING THE BOX CONTENTS

Outline your C-50 Zoom Camera and the parts as shown in the illustration. You'll need these to complete the steps for the camera setup procedures that follow.

The following items are also included in the C-50 Zoom package: Basic Manual, Battery charger instructions, video cable, RM-1 remote control, warranty card, registration card, and safety precautions booklet.

2 PREPARE THE CAMERA FOR USE

Before you begin using your Olympus C-50 Zoom Digital Camera...

a. Charging the battery

The C-50 Zoom uses an Olympus Lithium Ion Battery (2x AA) and dedicated charger (2-100C). This is the only battery/charger designed for use with the C-50 Zoom. The battery cannot be charged while in the camera.

Note: The Lithium Ion Battery is not fully charged when the camera is purchased. You must fully charge the battery using the charger before first use.

- Insert the Lithium Ion Battery into the charger as indicated in the illustration.
- Connect the battery charger AC cable as shown to a standard wall outlet.
- To fully charge the battery requires approximately 2 hours. The charge indicator light will be red when charging, and will turn green when the charging process is complete.

b. Loading the battery

Note: The C-50 Battery and media card compartments are accessed by opening the camera compartment cover.

- Slide the battery/card compartment cover in the direction of the arrow, and lift open the cover as shown in the illustration.
- Insert the battery (into the label) inside the battery chamber into the compartment. When the battery is fully inserted, the red locking lever will be engaged.
- Do not close the battery/card compartment cover at this time.

Note: An optional Olympus D-400C AC adapter is available, and is recommended when shooting video to ensure proper results. See the D-400C Basic Manual for more information.

c. Insert the xD-Picture Card

The xD-Picture Card is where the camera stores your pictures and is available in a variety of memory capacities. The pictures you take with the camera remain on the xD-Picture Card even when the camera is turned off and/or the battery is removed.

- Insert the xD-Picture Card into the spring-loaded card slot as shown in the illustration. Push the card fully into the slot. The card will lock into place when fully inserted.
- To remove, push down on the xD-Picture Card. The card will pop up.
- Full to remove.
- Close the battery/card compartment cover and slide it back to lock it into place.

d. Attach the strap properly

Attach the strap as illustrated to make the camera easier to handle.

3 TURNING ON THE CAMERA

All you need to do is slide the lens barrel open or closed to turn the camera ON or OFF.

a. Turn the camera ON (on/off mode)

- Open the lens barrel fully until it clicks. The lens extends.
- To turn the camera off, slide the lens barrel until you feel the first click. Wait until the lens is fully retracted, then close the lens barrel all the way.

Note: To maximize battery life, the C-50 Zoom Digital Camera features a power saving mode which automatically turns the camera off after 10 minutes of inactivity. To turn the camera back on, simply slide the lens barrel out to make the camera ready.

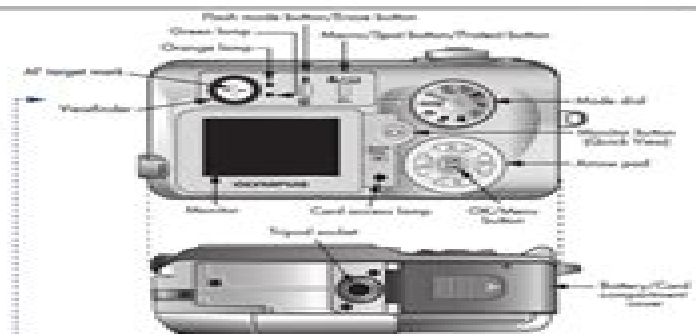

b. Set the Date and Time continuously

Although this is not required, it is recommended that you set the date and time. This affects the way image file names are created, and will conveniently include this information with each picture.

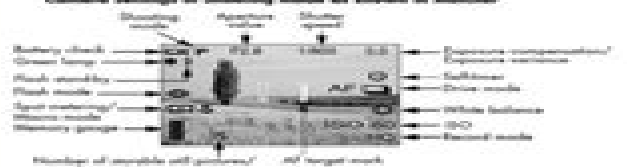

- With the lens barrel closed, press **Q** (power). The monitor will turn on with "This Picture" displayed on the monitor.
- Press **Q** to display the menu.
- Press **Q** to select **MODE MENU**.
- Press **Q** three times to select **SETUP**.
- Press **Q** again, and then **Q** three times to highlight **DATE**, and then press **Q** again.
- Use **Q** to select the date format (usually M, D, Y).
- Adjust the date and time in the appropriate fields by using **Q** to select the field, and **Q** to set the proper value. Repeat this step until all date/time fields have been set.
- Note:** Time is entered using the 24-hour format.
- Press **Q** twice to store the date and time and exit the menu.

c. Camera Diagram and Controls

Please take a moment to familiarize yourself with the key areas of camera controls by reviewing the illustrations.

Camera Settings in Shooting Mode as shown in Monitor

Camera Settings in Playback Mode as shown in Monitor

Note: Depending on the camera settings, not all indicators will be displayed.
