START HERE

It is strongly recommended that you follow these step-by-step numbered instructions to set up and quickly begin using your new Digital camera.

For more detailed instructions on advanced functions, please refer to the printed Reference Manual included in your package, or the Reference Manual on the CD-ROM.

1 UNPACKING THE BOX CONTENTS

Gather your Digital Camera and the parts, as shown in the illustration. You'll need these to complete the steps for the camera set-up procedures that follow.

Digital Camera

Strap

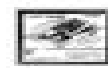

Li-100B Digital camera battery

Li-100C Battery charger

AC cable for the battery charger

CD-ROM (QuickStart Guide and Reference Manual)

USB cable

xD-Picture Card

The following items are also included in the Digital Camera package: Basic Manual, AV cable, RM-1 remote control, warranty card, registration card (not provided in some areas).

2 PREPARING THE CAMERA FOR USE

Before you begin using your Olympus Digital Camera.

a. Charging the battery

The Digital Camera uses an Olympus Lithium-Ion battery (Li-100B) and dedicated charger (Li-100C). This is the only battery/charger designed for use with the Digital Camera. The battery cannot be charged while in the camera.

- **Note:** The Lithium-Ion battery is not fully charged when the camera is purchased. You must fully charge the battery using the charger before first use.
- Insert the Lithium-Ion battery into the charger as indicated in the illustration.
- Connect the battery charger AC cable as shown to a standard wall outlet.
- To fully charge the battery requires approximately 2 hours. The charge indicator light will red when charging, and will turn green when the charging process is complete.

b. Loading the battery

- **Note:** The battery and xD-Picture card compartments are accessed by opening the respective compartment covers.

- Slide the battery compartment cover in the direction of the arrow, and lift open the cover as shown in the illustration. The pictures you take will be stored on the cover.
- Insert the battery into the compartment.
- Close the battery compartment cover so that it pushes the battery in, and lock the cover using protruding tab mark.
- **Note:** If the battery compartment cover is hard to close, do not force it. Press up on the cover flange to close the cover, and then slide it into position.
- To remove the battery, make sure that the monitor and the lamp at the side of the viewfinder are off. Return the camera to the upright position and to the battery out.

c. Inserting the xD-Picture Card

The xD-Picture Card is where the camera stores your pictures and is available in a variety of memory capacities. The pictures you take with the camera remain on the xD-Picture Card even when the camera is turned off and/or the battery is removed.

- Open the connector cover while pressing the **Q** mark on the illustration.
- Open the card cover to display the card cover tab. Insert the card into the xD-Picture Card cover. The card cover tab will snap when fully inserted.
- To remove, pull the card all the way in to unlock it, then pull it out slowly.
- Close the card cover before closing the connector cover.
- Press **Q** to close the connector cover.

Confirm you have installed the battery and xD-Picture Card properly by pressing **Q**. The "NO PICTURE" message should be displayed in the monitor. Turn the camera off by pressing **Q** again.

d. Attaching the strap (optional)

Attach the strap as illustrated to make the camera easier to handle.

3 TURNING ON THE CAMERA

All you need to do is slide the lens barrel open or close to turn the camera ON or OFF.

a. Turning the camera ON (powered mode)

- Slide the lens barrel fully until it clicks. The lens extends.
- To turn the camera off, slide the lens barrel until you feel the first click. Wait until the lens is fully retracted, then close the lens barrel all the way.

To maximize battery life, the Digital Camera features a power saving mode in which the camera enters a sleep mode after approximately three (3) minutes of non-use. Press the shutter button to wake up the camera.

b. Setting the Date and Time (optional)

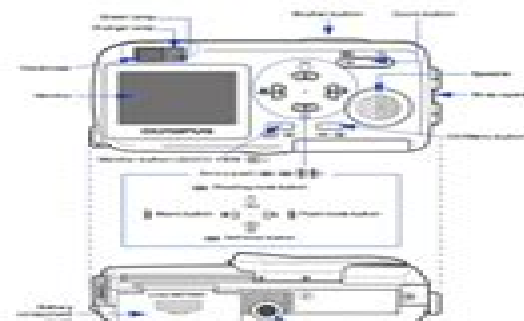

Set the date and time when using the camera for the first time. This affects the way image file names are created, and will conveniently include this information with each picture.

- With the front lens barrel closed, press **Q** once. The monitor will turn on with "NO PICTURE" displayed in the monitor. (The date and time can also be set when the camera is in the shooting mode.)
- Press **Q** to display the tag menu.
- Press **Q** to select MODE MENU.
- Press **Q** to select SETUP, and then press **Q**.
- Press **Q** to select **Q**, and then press **Q**.
- Use **Q** to select the date format.
- Adjust the date and time in the appropriate fields by using **Q** to select the field, and **Q** to set the proper value. Repeat this step until all date/time fields have been set.

- **Note:** Time is entered using the 24-hour format.
- Press **Q** to store the date and time.

c. Camera Diagram and Controls

Now take a moment to familiarize yourself with the key areas of camera controls by reviewing the illustrations.

Camera Settings in Shooting Mode as shown in Monitor

Camera Settings in Playback Mode as shown in Monitor

• **Note:** Depending on the camera settings, not all indicators will be displayed.
