Tissue Engineering Methods and Protocols Jeffrey R. Morgan, Martin L. Yarmush, 1998-09-28 In recent years the field of tissue engineering has begun in part to coalesce around the important clinical goal of developing substitutes or replacements for defective tissues or organs These efforts are focused on many tissues including skin cartilage liver pancreas bone blood muscle the vasculature and nerves There is a staggering medical need for new and effective treatments for acquired as well as inherited defects of organs tissues Tissue engineering is at the interface of the life sciences engineering and clinical medicine

and so draws upon advances in cell and molecular biology materials sciences and surgery as well as chemical and mechanical engineering Such an interdisciplinary field requires a broad knowledge base as well as the use of a wide assortment of methods and approaches It is hoped that by bringing together these protocols this book will help to form connections between the different disciplines and further stimulate the synergism underlying the foundation of the tissue engineering field

Evolution of Reproductive Organs in Land Plants Xin Wang, Zhong-Jian Liu, Borja Cascales-Miñana, José Bienvenido Diez, 2018-04-06 The great diversity of land plants especially angiosperms is mainly reflected in the diversity of various reproductive organs of plants However despite long time intensive investigations there are still uncertainties and sometimes misunderstandings over the nature and evolution of reproductive organs in land plants With the new advances made in various fields of botany especially at molecular level there is increasing light shed on some aspects of flowers reproductive organs of angiosperms In this ebook we collect 15 papers reporting new understanding on plant reproductive organs These works range from morphology and anatomy to molecular regulatory networks underlying traditional observations We understand this single book cannot reach our goal but we do hope that this book can contribute to or initiate some efforts leading to the final solution of some problems concerning the homology and evolution of reproductive organs in plants
