presented were carefully reviewed and selected from 97 submissions The papers are organized in topical sections on past futures and present futures research and pedagogy past futures and present futures aesthetics and ethics of space architectural automations and augmentations design architectural automations and augmentations fabrication architectural automations and augmentations environment architectural automations and augmentations spatial computing *Excavating Los Angeles* Midori Mizuhara,Massachusetts Institute of Technology. Department of Urban Studies and Planning,2013 After decades of planning recent voter approved tax initiatives have enabled Los Angeles to expand its mass transit infrastructure Fast tracked construction projects of subway and light rail lines will connect areas of the city for the first time since the early 20th century streetcar era Increasing levels of population growth currently challenge LAs low density horizontal suburban form to fold inward and build upon itself in new ways and the city has embraced transit oriented development TOD as a strategy for accommodating this new growth at higher densities This moment provides a unique opportunity for architects urban designers and planners to rethink large scale urban design projects in LA and generate urban forms that reflect the identity of the city as opposed to importing outside models This thesis explores urban design futures through the lens of the TOD and aims to create an LA specific model In a city that is defined by multiple layers of massive infrastructural systems designers need to think about how projects fit into larger scale systems in order to mediate these systems and find design opportunities within them What are the LA specific urban design goals that should guide new transit oriented development How can this scale of urban design project leverage large scale infrastructure systems and landscape elements to enhance the public realm mediate the environment and create an intermediate symbolic orienting structure for the city This thesis research explores these questions through three forms of inquiry theory mapping and design Theory research aims to understand what is meant by LA urbanism and creates a framework by which to understand future project within Mapping research generates a design agenda and attitude about the project Design research tests this agenda through a new LA specific TOD strategy through both site specific and prototypical design processes **City of the Future Graduation Lab** Roberto Cavallo,Joran Kuijper,Maurice Hartevelde,Marcelo Carreiro Matias,Mesut Ulkü,Sonja Draškovi?,2023-09-04 The Cross Domain City of the Future Graduation Lab situated in the Faculty of Architecture and the Built Environment at TU Delft has been a pioneer in experimenting with a multidisciplinary approach to education on the built environment Drawing upon this expertise over the past years this book reflects on multidisciplinary in the built environment and its implementation in education on the built environment How should one approach multidisciplinary in education and practice What encompasses its core elements benefits and challenges By addressing these questions the book aims to inform students and practitioners within the realm of the built environment by sharing insights from experiences in multidisciplinary education It presents eight conclusions regarding the future of multidisciplinary education and thereby seeks to contribute to a more humane and sustainable future for cities Process is central to multidisciplinary collaboration Negotiating positions

ensuring an environment of respect balance and open mindedness and setting a common vocabulary Multidisciplinarity can be a way to foster innovation It triggers complementarity and confrontation As with any innovation there is potential for greater outcomes but at the same time extra risks emerge These need to be managed Multidisciplinarity could be better integrated into organisational structures Disciplinarity and multidisciplinarity are in mutual coexistence They are inseparable They can complement and contradict each other Problem precedes solution not the opposite Framing the problem or problematizing is a considerable share of the actual solution This is particularly applicable to multidisciplinarity Multidisciplinarity is by nature composed of fluid boundaries Navigating through an enormous diversity of perspectives requires agility flexibility independence spirit of adventure and embracing uncertainty Professionals should be trained as T shape grounded in their field while able to dialogue with other fields Both generalists and specialists are needed Education should provide opportunities for both

BOOK JACKET

Advanced City Ali Cheshmehzangi,2025-09-01 Evolution is by choice This is not a passive truth but a conscious commitment one that lies at the heart of what I call the Advanced City Coined and thoroughly introduced here in the book this new concept is based on people centric and data informed processes to enhance our cities and communities for their future and not for imagining future cities This is not another model in the long line of urban prescriptions nor a distant techno utopia to be fantasized It is a paradigm shift an invitation to think feel and build differently The Advanced City is a lived revolution a dynamic process grounded in values purpose and practice Too often we romanticize the future city glass towers flying cars machines and robots everywhere data driven dreams But these visions distract us from the urgency of the present They bypass the real work of transformation by projecting change onto an abstract tomorrow The Advanced City asks something deeper What kind of cities are we actively creating today here and now It is not about waiting for innovation to arrive It is about choosing a different path rooted in responsibility equity and long view thinking This book is not about cities as machines markets or spectacles It is about cities as ecosystems of meaning struggle creativity and care The Advanced City is a movement of re engagement for academics for planners for civic leaders and for all who call the city home It calls on us to be co creators of our urban futures not passive consumers of predesigned and predetermined solutions We need radical honesty about the failures of current systems and the intellectual courage to reimagine what s possible The advanced city resists the illusion of smartness and returns us to human truths

interdependence justice and purpose It is about making change not waiting for it So this is not a new product for urban branding it is rather a process for transformation a paradigm shift and an urban revolution A call to co create cities that are not merely advanced in function but advanced in wisdom Here I also call for the development of Brother Cities and Advanced Development Goals ADGs If not now when If not us who Let the Advanced City be an urban revolution of now and the future to be lived not later but now not for the future cities but for the future of our cities and communities **Understanding**

Urbanism Dallas Rogers, Adrienne Keane, Tooran Alizadeh, Jacqueline Nelson, 2020-07-21 Understanding Urbanism presents built environment students with the latest approaches to studying urbanism The book is written in an accessible and easy to understand format by leading urban academics and practitioners with decades of teaching and practical experience As students move through the chapters they will develop a critical understanding of the different ways architects urban and social planners urban designers heritage professionals engineers and other built environment professionals design our cities Importantly the book shows how and why the built environment professional of the future will need to work within the Indigenous context of cities in countries like Australia New Zealand the United States and Canada **High-Rise Living in**

Asian Cities Belinda Yuen, Anthony G.O. Yeh, 2011-02-02 This book is intended to fill a knowledge gap in the study of contemporary high rise living While there has been much documentation on the engineering and technological aspects of tall buildings relatively little has been written about the social and livability of high rise Much less is written about Asian cities even though Asia is the current hotbed of high rise development Even though traditional discourse of high rise housing is not always positive new forces are redefining its place in 21st century urbanity Many cities around the world are reembracing high rise in urban agenda under current narrative of sustainable development High rise is fast becoming a priority area in international research agenda The quest is for livable and sustainable high rise development Against the background of current trends globalization urbanization mixed use development and new built taller buildings in inner city areas in both developed and developing countries this book examines the software design economics estate management legal and property rights physical environment planning community development and social dimensions of high rise living Analysis is with the widely acclaimed successful high rise public housing in Hong Kong and Singapore to understand the advantages and worries of high rise living and to distill the key points and lessons in the making of a good highrise living environment Hong Kong and Singapore have been constructing high rise for more than four decades each The majority of their population has moved to live in high rise selecting to live high rise and registering consistently high residential satisfaction The height of apartment buildings in both cities continues to rise The tallest is anticipated to be 70 storey It is the contention of this book that contrary to earlier common negative discourses on public high rise living the high rise environment may yet offer urban residents a satisfying dwelling experience Leading housing academics researchers and practitioners in the two cities have contributed to this book This book presents a timely contribution to our understanding of a widening urban phenomenon that

will affect a growing number of the world's population

Playable Cities Anton Nijholt, 2016-10-14 This book addresses the topic of playable cities which use the smartness of digital cities to offer their citizens playful events and activities The contributions presented here examine various aspects of playable cities including developments in pervasive and urban games the use of urban data to design games and playful applications architecture design and playability and mischief and humor in playable cities The smartness of digital cities can be found in the sensors and actuators that are embedded in their environment This smartness allows them to monitor anticipate and support our activities and increases the efficiency of the cities and our activities These urban smart technologies can offer citizens playful interactions with streets buildings street furniture traffic public art and entertainment large public displays and public events

Future Challenges in Evaluating and Managing Sustainable Development in the Built Environment Peter S. Brandon, Patrizia Lombardi, Geoffrey Q. Shen, 2024-09-23 Future Challenges in Sustainable Development within the Built Environment stimulates and reinterprets the demands of Responsible and Sustainable Development in the Built Environment for future action and development It examines the methods of evaluation the use of technology the creation of new models and the role of human factors for examining and developing the subject over the next twenty years

The AI City Siegfried Zhiqiang WU, 2025-05-29 This open access book presents the concept of AI Cities for the first time It includes the theoretical basis development frontier and different application scenarios of artificial intelligence cities The book is accompanied by rich practical cases to conduct in depth and detailed discussions on the proposition of artificial intelligence cities It fills the gap between artificial intelligence and urban planning This book points out the urgent human needs in the city for AI scientists to be considered in the next round of AI technology development It also provides new ideas for urban planners and researchers to solve problems with new technologies

The Palgrave Handbook of Bottom-Up Urbanism Mahyar Arefi, Conrad Kickert, 2018-06-27 Who shapes our cities In an age of increasing urban pluralism globalization and immigration decreasing public budgets and an ongoing crisis of authority among designers and planners the urban environment is shaped by a number of non traditional stakeholders The book surveys the kaleidoscope of views on the agency of urbanism providing an overview of the various scholarly debates and territories that pertain to bottom up efforts such as everyday urbanism DIY urbanism guerilla urbanism tactical urbanism and lean urbanism Uniquely this book seeks connections between the various movements by curating a range of views on the past present and future of bottom up urbanism The contributors also connect the recent trend of bottom up efforts in the West with urban informality in the Global South drawing parallels and finding contrast between social and institutional structures across the globe The book appeals to urbanists in the widest sense of the word those who shape study and improve our urban spaces
