### **The Peace Corps: Current Issues**

Curt Tarnoff  
Specialist in Foreign Affairs  
Foreign Affairs, Defense, and Trade Division

#### **Summary**

When the 111<sup>th</sup> Congress convenes in 2009, it is expected to finalize the FY2009 appropriations level and consider the FY2010 level of funding for the Peace Corps. Congress may also address a Peace Corps re-authorization and related issues. This report will be updated as events warrant.

Generally viewed positively by the public and widely supported in Congress, the Peace Corps, the U.S. agency that provides volunteer skills internationally, drew congressional attention in recent years largely due to a 2002 Presidential initiative to double the size of the volunteer force. While this effort produced re-authorization bills in the 108<sup>th</sup>, 109<sup>th</sup>, and 110<sup>th</sup> Congresses, some of which were approved by House or Senate, none made it into law. In 2009, the 111<sup>th</sup> Congress will consider the new President's annual funding request for the Peace Corps. In addition, a new re-authorization effort is expected by many observers.

#### **Background**

Founded in 1961, the Peace Corps has sought to meet its legislative mandate of promoting world peace and friendship by sending American volunteers to serve at the grassroots level in villages and towns in all corners of the globe. Living and working with ordinary people, volunteers have contributed in a variety of capacities — such as teachers, environmental specialists, health promoters, and small business advisers — to improving the lives of those they serve and helping others understand American culture. They also seek to share their understanding of other countries with Americans back home through efforts like the Paul D. Coverdell World Wise School program, which links serving volunteers with U.S. elementary school classrooms. To date, more than 187,000 Peace Corps volunteers have served in 139 countries. About 7,876 volunteers currently serve in 76 nations. Ronald A. Tschetter, a former volunteer, is the current Peace Corps Director.

In addition to its basic two-year tour of duty, the Peace Corps introduced in 1996 an initiative called Peace Corps Response (formerly Crisis Corps), drawing on former volunteers to provide short-term (up to six months) emergency and humanitarian assistance at the community level with NGOs, relief, and other development organizations. Hundreds of Peace Corps Response volunteers have served in 40

**Maximizing the Policy-Relevance of Research for School Improvement** Angela M. Urick,David E. DeMatthews,Timothy G. Ford,2021-01-01 Education policy and policy making is shaped through the activities of a complex network of educators educational leaders researchers community members as well as government and non government officials and organizations Educational researchers are a critical player in this complex network and their investigations of

various educational phenomena can answer questions relevant to the design and implementation of education policy for school improvement. Educational research however often has limited influence in larger policy conversations and decisions (Orland 2009) and this is due to many factors. Educational researchers can provide an evidence based starting place for discussions about school improvement with the complex network of stakeholders engaged in policy development and implementation but they must be more intentionally and systematically thoughtful about the connections of their work to policy and policy making. Furthermore researchers can increase the relevance of their work for policy through the careful design and framing of research in collaboration with end users and an awareness of its implications. In so doing researchers can spur the interest and dissemination of their findings to wider audiences. This book offers resources for education researchers, faculty and advanced graduate students interested in maximizing the relevance of their research on policy for school improvement. In achieving this purpose the book is organized into three sections: 1 A primer for education policy making in the United States; 2 Designing research to maximize education policy relevance; and 3 Engaging users of research to communicate its relevance to policymakers. This book is primarily for education researchers, faculty and advanced graduate students seeking to improve the visibility and impact of their research on school improvement particularly in the realm of educational policy and policy making. While this book is a volume in the book series for the American Educational Research Association Special Interest Group Leadership for School Improvement, the importance and usefulness of the topics covered span education research more broadly. Further the content of this book serves as a comprehensive guide for how education researchers in general can better situate their work to influence policy. The book is intended to be utilized by university scholars, graduate students in research or policy courses, post doctoral fellows as well as research associates or directors in various organizations relevant to education such as research consulting groups, non profits which serve education, causes, teacher unions, state agencies or state level educator organizations, associations and think tanks. Emerging or established researchers in any of these organizations who want to increase the relevance, significance and dissemination of their work into education policy will hopefully find this book useful. Retrenchment in the American Welfare State Martin

Schuldes, 2011. The consolidation of public finance has become the most prevalent topic in recent policy discourse in the US. However the political debate about fiscal belt tightening stretches back to the last decades of the past millennium induced by deteriorating economic conditions which followed the first oil price shock in the early 1970s. Retrenchment in the American Welfare State investigates to what extent different welfare state programs in the US were affected by cutbacks during the Republican Reagan era on the one hand and during the Democratic Clinton era on the other and to what extent these cutbacks reveal certain patterns of retrenchment and how the measured discrepancies can best be explained. *Series Studies in North American History, Politics and Society*.
