Global Virology I - Identifying and Investigating Viral Diseases Paul Shapshak, John T. Sinnott, Charurut Somboonwit, Jens H. Kuhn, 2015-07-13 This book provides trajectories and illustrations of viruses that have catapulted into the global arena linked to humans animals and vectors due to human behaviors in recent years as well as viruses that have already shown expansion among humans animals and vectors just a few decades ago Topics in the current book include vaccines environmental impact emerging virus transmission Filovirus Ebola hemorrhagic fevers flaviviruses Dengue evasion papillomaviruses Hepatitis C Nipah virus giant viruses hantaviruses bunyaviruses encephalitides West Nile virus Zika virus XMRV henipaviruses human respiratory syncytial virus influenza A virus several aspects of HIV 1

The OIE Global Conference on Aquatic Animal Health, Bergen, Norway, 9-12 October 2006 Betty Dodet, 2007 Aquaculture is one of the fastest growing industries globally its production volume currently represents over 40% of all

fisheries and within a few years will surpass that of traditional fisheries New species and methodologies contribute to the fact that new emerging diseases are increasingly being discovered within this field and aquatic animal welfare issues are only just beginning to be considered This OIE Global Conference on Aquatic Animal Health was an opportunity for the OIE and its Member Countries to help build a framework for improved involvement and cooperation between the authorities Veterinary and Fish Health Fisheries and Environment the scientific community and the private sector on aquatic animal health and welfare help clarify the roles and responsibilities of all stakeholders in the process of early disease detection rapid response and reporting help increase aquatic animal health emergency response capabilities exchange information on emerging diseases and animal welfare issues help develop a science based approach to the management of aquatic animal health and welfare and present the valuable experience gained in the past few years Following the presentations and discussions recommendations were developed to better define roles and responsibilities and to assist in the evaluation and improvement of the current standards and guidelines for better control of infectious aquatic animal health and the preparedness of countries for aquatic animal disease emergencies

Aquaculture Microbiology and Biotechnology, Vol. 1 Didier Montet, R.C. Ray, 2009-01-08 Accounting for nearly half 45% of the world's food fish including fish crustaceans molluscs and amphibians aquaculture is currently one of today's fastest growing production sectors Aquaculture Microbiology and Biotechnology examines the advances and research in genetic manipulation and biotechnology that provide the foundation and fuel for this rapid growth It discusses commonly used methods such as chromosome manipulation and hormone treatment and the application of these techniques to produce triploid tetraploid haploid gynogenetic and androgenetic fish

Changing Trends in Managing Aquatic Animal Disease Emergencies Eva-Maria Bernoth, 2008 With the increase in the culture of new aquatic animal species and the consequential discovery of new and emerging diseases it appears timely to provide an update on the range of disease emergency management strategies The main purpose of this volume of the Review is therefore to provide a state of the art compilation and assessment of aquatic animal disease emergency management strategies covering policies as well as operational tools from international to farm levels It aims to provide useful generic information on the different issues surrounding the management of aquatic animal disease emergencies written by world specialists

In the Wrong Place - Alien Marine Crustaceans: Distribution, Biology and Impacts Bella S. Galil, Paul F. Clark, James T. Carlton, 2011-04-01 In *The Wrong Place Alien Marine Crustaceans Distribution Biology And Impacts* provides a unique view into the remarkable story of how shrimps crabs and lobsters and their many relatives have been distributed around the world by human activity and the profound implications of this global reorganization of biodiversity for marine conservation biology Many crustaceans form the base of marine food chains and are often prominent predators and competitors acting as ecological engineers in marine ecosystems Commencing in the 1800s global commerce began to move hundreds perhaps thousands of species of marine crustaceans across oceans and between

continents both intentionally and unintentionally This book tells the story of these invasions from Arctic waters to tropical shores highlighting not only the importance and impact of all prominent crustacean invasions in the world's oceans but also the commercial exploitation of invasive crabs and shrimps Topics explored for the first time in one volume include the historical roots of man's impact on crustacean biogeography the global dispersal of crabs barnacle invasions insights into the potential scale of tropical invasions the history of the world's most widely cultured shrimp the invasive history and management of red king crabs in Norway Chinese mitten crabs in England and American blue crabs in Europe the evolutionary ecology of green crabs and many other subjects as well touching upon all ocean shores
