

Age of Exploration – Why Columbus Knew What He Knew

Duration	One 45-Minute Lesson
-----------------	-----------------------------

Overview

In this lesson, students will learn what educated Europeans thought of the world in the late 15th century. It was the time of the Renaissance! Europe was reawakening and this was seen in the area of navigation, geography, and cartography. Students will learn that most of what Europeans thought of the world was largely inaccurate. However, based on the knowledge at that time it makes sense that Columbus thought he could reach Asia by sailing west. The creation of a globe by a German mapmaker, Martin Behaim in the same year that the Columbus voyage happens shows that these ideas were not localized. Students will also create their own "Erdapfel", Behaim's famous "Earth Apple".

Objectives

- The student will identify Behaim's "Earth Apple" as an early globe dating to 1492.
- The student will summarize what educated Europeans thought of the world in the late 15th century.
- The student will create a replica of Behaim's globe.

Materials and Resources

- PowerPoint of Martin Behaim and his "Erdapfel"
- Balloons – 12 inch
- Sharpies or another type of permanent marker
- Projector and white board
- Expo markers

Teacher Introduction

The man known to many, as Christopher Columbus wasn't working on a hunch that land lay across the vast ocean sea to the west. Christobal Colon, as the Spanish knew him, didn't just have a dream one night saying, "Go west, young man!" In this lesson, students learn how Columbus knew what he knew and it wasn't a secret. Yes, many people in the 15th century were superstitious. However, many were also educated! It was the time of the Renaissance!
