Advanced Flow Assurance with OLGA 7

Objectives*:

- Calculate Liquid Surge Volume due to pigging (and shut-in - start-up)
- Perform a blow-down simulation of a shut-in pipeline
- Use a controller to control the blow-down
- First size estimate of a Slug Catcher/Separator
- Calculate Amplification and Integral time for a PI level controller

The Sadaf field is a new offshore Gas-Condensate subsea development at 100 meters depth. A new process facility is being developed onshore to handle the gas from the field. The gas and condensate will be transported un-treated from the Sadaf field to the process facility through a 77 km long 28" pipeline. The Process facility is located 21 meters above Mean Sea Level (MSL). See sketch below.

* We use the OLGA 7 HD model for this case study

The Handbook of Dialectology Charles Boberg, John Nerbonne, Dominic Watt, 2018-01-31 The Handbook of Dialectology provides an authoritative up to date and unusually broad account of the study of dialect in one volume Each chapter reviews essential research and offers a critical discussion of the past present and future development of the area The volume is based on state of the art research in dialectology around the world providing the most current work available with an unusually broad scope of topics Provides a practical guide to the many methodological and statistical issues surrounding the collection and analysis of dialect data Offers summaries of dialect variation in the world s most widely spoken and commonly studied languages including several non European languages that have traditionally received less attention in general discussions of dialectology Reviews the intellectual development of the field including its main theoretical schools of thought and research traditions both academic and applied The editors are well known and highly respected with a deep knowledge of this vast field of inquiry

Manual of Romance Forensic Linguistics Victoria Guillén-Nieto, Dieter Stein, 2025-06-02 It is evident that published serious science based work in Forensic Linguistics is predominantly written in English and focuses on casework from the English speaking world While the first aspect is understandable given that English serves as an international lingua franca in scientific discourse the second aspect presents a significant limitation for the field Should researchers assume that there is simply less crime in non English speaking areas of the world A more pertinent question might be What cultural disciplinary legal or legal cultural factors contribute to the lack of research in and on languages other than English In addition to addressing the underrepresentation of Romance languages in scientific publications related to forensic work the chapters in this handbook will also explore the reasons behind this unfortunate situation Designed to engage readers whether they are linguists legal professionals or simply interested individuals and to spark interest in Romance Forensic Linguistics this handbook follows three key objectives First we are committed to providing a comprehensive overview of the casework and research conducted in and on several Romance languages including Peninsular Spanish Catalan Brazilian Portuguese French Canadian French Italian and Romanian Second the chapters in this volume seek to understand why Forensic Linguistics has thrived more in some Romance speaking countries than in others Finally we aim to uncover the reasons for the slower development of Forensic Linguistics in regions where Romance languages are predominantly spoken
