HIGH-LEVEL DISINFECTION

1 Soak with disinfectant. Attach a section cleaning adapter (SAC-122) to the previously cleaned bronchoscope. Immerse completely in disinfectant solution.

2 Attach springs to the collector. Fit the plunger of the springs to the independent suction channel and suction channel cleaning adapter with disinfectant solution.

3 While immersed, detach the collector. Use a clean, lint-free cloth to wipe away any residual clinging to external surfaces.

4 Soak all equipment according to the time and temperature recommended by the disinfectant manufacturer. Use a timer to measure the exact contact time.

5 Connect the suction cleaning adapter and springs. Insert air to ensure tightness from the main manufacturing channel. Then remove the bronchoscope from the disinfectant.

6 Disconnect the suction cleaning adapter and immerse the bronchoscope and adapter in water. Soak 30 minutes. Inspect both independent main and suction channels.

7 Connect section cleaning adapter to bronchoscope and to a tube from a suction pump. Aspirate water through channels for 30 seconds. Run out from water and aspirate air through channels for 30 seconds.

8 Immerse the bronchoscope and adapter in 70% alcohol and aspirate alcohol for 5 seconds. Remove the alcohol and from the alcohol and aspirate air for 20 seconds.

RINSING

DRYING

9 Turn the section pump off. Hold the control section with the openings pointing down and disconnect the section cleaning adapter.

10 Dry the bronchoscope and adapter with a clean, lint-free cloth maintained with alcohol. Make sure that the equipment is completely dry prior to storage.

TRANSPORTATION

Hold all parts of the bronchoscope when carrying. Do not let the ends of the bronchoscope swing freely.
