Teaching History in the Era of Globalization: Epistemological and Methodological Challenges Cosme J. Gómez Carrasco, Pilar Rivero, Álvaro Chaparro-Sainz, 2022-10-20 Research Methods for Psychological Science William J. Ray, 2021-08-05 Written by experimental research expert Dr William J Ray Research Methods for Psychological Science introduces students to the principles and practice of conducting research in psychology in an engaging story telling format Ray helps students understand how research increases our understanding of ourselves and our environment and how logic

and best practices can increase our understanding of human behavior Whether their future roles will be researchers consumers of research or informed citizens students will learn the importance of developing testable hypotheses how to evaluate new information critically and the impact of research on ourselves and our society Based on Ray s influential textbook *Methods Toward a Science of Behavior and Experience* the book offers up to date pedagogy structure and exercises to reinforce the student s learning experience

National Library of Medicine Audiovisuals Catalog National Library of Medicine (U.S.), *Program Evaluation for Social Workers* Richard M. Grinnell, Peter Gabor (Sociologist), Yvonne A. Unrau, 2016 First published in 1994 this text is designed to be used by graduate level social work students in courses on evaluation and program design Over the course of 20 years and 6 editions the goals of the book have remained the same to prepare students to participate in evaluative activities within their organizations to prepare students to become critical producers and consumers of professional evaluative literature and to prepare students for more advanced evaluation courses and texts Grinnell Gabor and Unrau aim to meet these objectives by presenting a unique approach that is realistic practical applied and user friendly While a majority of textbooks focus on program level evaluation some recent books present case level evaluation methods but rely on inferentially powerful but difficult to implement experimental baseline designs This text assumes that neither of these approaches adequately reflects the realities of the field or the needs of students and beginning practitioners Instead *Program Evaluation for Social Workers* offers a blend of the two that demonstrates how they can complement one another The integration of case level and program level approaches provides an accessible adaptable and realistic framework for students to more easily grasp and implement in the real world
