Evarestov, 2007-08-16 Quantum Chemistry of Solids delivers a comprehensive account of the main features and possibilities of LCAO methods for the first principles calculations of electronic structure of periodic systems The first part describes the basic theory underlying the LCAO methods applied to periodic systems and the use of wave function based Hartree Fock density based DFT and hybrid hamiltonians The translation and site symmetry consideration is included to

establish connection between k space solid state physics and real space quantum chemistry methods in the framework of cyclic model of an infinite crystal The inclusion of electron correlation effects for periodic systems is considered on the basis of localized crystalline orbitals The possibilities of LCAO methods for chemical bonding analysis in periodic systems are discussed The second part deals with the applications of LCAO methods for calculations of bulk crystal properties including magnetic ordering and crystal structure optimization The discussion of the results of some supercell calculations of point defects in non metallic solids and of the crystalline surfaces electronic structure illustrates the efficiency of LCAO method for solids

Continuum Solvation Models in Chemical Physics Benedetta Mennucci, Roberto Cammi, 2008-02-28 This book covers the theory and applications of continuum solvation models The main focus is on the quantum mechanical version of these models but classical approaches and combined or hybrid techniques are also discussed Devoted to solvation models in which reviews of the theory the computational implementation Solvation continuum models are treated using the different points of view from experts belonging to different research fields Can be read at two levels one more introductive and the other more detailed and more technical on specific physical and numerical aspects involved in each issue and or application Possible limitations or incompleteness of models is pointed out with if possible indications of future developments Four colour representation of the computational modeling throughout
