The Alumni Factor The Alumni Factor, 2013-09-10 This book began with a simple premise that there is a better way to

assess and rank colleges and universities in America than those currently being offered The primary outcomes of most of today's rankings are 1 To provide readers a view of what life is like as an undergraduate and 2 To give insight into who comes into the college The Alumni Factor on the other hand is more interested in who comes out The aim of this guide is to describe how well a college or university actually develops and shapes its students and what becomes of them after they graduate The Alumni Factor is interested in the actual outcomes experienced by college graduates and the role their college played in creating those outcomes The Alumni Factor believes this information regarding graduate outcomes is truly essential to understanding and assessing our colleges and universities today In line with these goals The Alumni Factor provides a detailed in depth profile of graduates from 225 of our nation's top colleges The profiles were constructed almost entirely with data and insights from the actual college alumni themselves Readers will find The Alumni Factor to be a fascinating look at the incredibly diverse academic social and cultural choices available to capable students today

Toxic Schools Bowen Paulte, 2013-10-04 Violent urban schools loom large in our culture for decades they have served as the centerpieces of political campaigns and as window dressing for brutal television shows and movies Yet unequal access to quality schools remains the single greatest failing of our society and one of the most hotly debated issues of our time Of all the usual words used to describe non selective city schools segregated unequal violent none comes close to characterizing their systemic dysfunction in high poverty neighborhoods The most accurate word is toxic When Bowen Paulte speaks of toxicity he speaks of educational worlds dominated by intimidation and anxiety by ambivalence degradation and shame Based on six years of teaching and research in the South Bronx and in Southeast Amsterdam Toxic Schools is the first fully participatory ethnographic study of its kind and a searing examination of daily life in two radically different settings What these schools have in common however are not the predictable ideas about race and educational achievement but the tragically similar habituated stress responses of students forced to endure the experience of constant vulnerability From both sides of the Atlantic Ocean Paulte paints an intimate portrait of how students and teachers actually cope in real time with the chronic stress peer group dynamics and subtle power politics of urban educational spaces in the perpetual shadow of aggression

and Intervention Strategies Edgar Galindo, Adelinda Araujo Candeias, Małgorzata Lipowska, Óscar Conceição De Sousa, Marcus Stueck, 2022-11-25 **Britannica Book of the Year**, 2013 **Jamaican Society and High Schooling** Errol Miller, 1990 School Effectiveness and Management in Secondary High Schools in Jamaica Georgette Rosemarie Bertram-Lewis, 1995 **Some Factors Affecting the Educational and Vocational Expectations of Jamaican Students in High Schools, Technical High Schools and New Secondary Schools** Verna E. Johnson, 1979 *A Study of the Organizational Systems of Selected Jamaican Secondary High Schools* Ormonde Horsman, 1973 **Inside Hillview High School** Hyacinth L. Evans, 2006 Hyacinth Evans detailed case study of a Jamaican high school formerly known as a junior secondary high school breaks new ground Her research demonstrates the continuing education problem encountered by students and teachers in a two tiered educational system The case study is an excellent example of the legacy of colonialism still evident in schooling processes in many of the former British colonies in the south for example countries in the Caribbean Africa and India Evans provides several solutions for the transformation of schools as places for learning and character development Provided by publisher **Jamaican Teachers, Jamaican Schools** Eleanor J. Blair, 2023-01-01 Nowhere is teachers lives and work more challenging than in Jamaican schools Teachers in Jamaica are regularly faced with limited resources and challenging students Teacher pay has been historically low and current conditions continue a long tradition of providing minimal compensation for teachers work Recent school reform efforts has been successful in producing a teaching force that is better educated than ever before and yet teachers are seldom given the autonomy in decision making and or respect that accompanies the work of comparable professions Coupled with these issues teachers regularly face hunger poverty behavioral issues and a lack of parental support as part and parcel of their experience in 21st century schools If teachers are perceived as having low professional status it is not surprising that they are often blamed for the shortcomings of Jamaican schools The citizens of Jamaica are firmly committed to the notion that every child can learn every child must learn however the reality is that while all children can learn many children do not learn in this country where the allocation of resources favors the rich and disowns the poor Public schools in Jamaica vary tremendously across the fourteen parishes Geography and social class regularly determine both the context and circumstances of teachers work and yet discussions of teachers seldom acknowledge the differences There is a place for a more in depth examination of teachers work and teachers lives in Jamaica where a consideration of the emergence of teacher leadership and higher professional status can intersect with a vision of new roles and responsibilities for teachers While many of the reports on Jamaican education consider the role of administrative leaders there is an absence of any discussion of the role of teacher leaders in school reform It is interesting that a country can advocate for higher levels of teacher preparation and an upgrading of the professional status of teachers and yet ignore the potential power of teachers as major actors directing efforts to reform the schools Teachers acting as leaders in a profession dominated by women would challenge the status quo and usurp preconceived notions regarding the

work of teachers In this book 21st century descriptions of teachers lives and work will accompany a consideration of how the transformation of the teaching profession could positively impact both schools and classrooms across the island
