

2524 Master Clock and Intercom Controller Operation

RAULAND-BORG CORPORATION • 3450 West Oakton Street, Skokie, Illinois 60076-2951 • (847) 679-0900

General Information

The Two Functional Modes

As its dual name signifies, this unit can perform two distinct functions: clock and communications. Its master-clock functions include keeping time, controlling different events (e.g., ringing bells, turning lights and equipment on and off), and correcting secondary clocks. Its communications functions include showing call-ins from associated room stations; using its dial pad for calling rooms, paging, and distributing a program source; checking the room-station wiring for faults; and monitoring room stations.

Variations in Equipment

Which operations a given 2524 will run depends in part upon what other equipment is in the system. The most obvious example is the "Comm" mode, which requires such items as a Director intercom control panel, speaker relay panels, and room speakers. As you go through this manual, you may find it helpful to place a check mark next to the operations that apply to your system, or to cross out those that do not apply.

Variations in Programming

The other major factor that determines which operations the 2524 will run is the programming. For example, the 2524 will not even enter the "Comm" mode unless that has been enabled. See the programming manual, KI-1629, for complete information.

Changing Run Modes

When the 2524 is in the Clock Run Mode, the "Clock" LED remains lit and its displays show the time of day, any event-zone activities, the day of the week, and the current

schedule. In the "Comm" Run Mode, only the "Comm" LED will be lit; the "Station" window will be dark unless it is displaying the number of a room that is calling in or is in communication with the system operator.

Automatic Switching

As soon as it detects a call-in or its numerical keys are used to dial a room, the 2524 automatically switches from the Clock Run Mode to the "Comm" Run Mode. When all such communications have ended, the 2524 automatically switches back to the Clock Run Mode.

Exception: If you manually switch from the "Comm" to the Clock Run Mode while a call-in is displayed, the 2524 will not return to the "Comm" Run Mode until you switch it back manually. The 2524 will continue to signal waiting call-ins with a "beep," but you will not be able to answer them from the 2524 until you switch it back to the "Comm" Run Mode.

Manual Switching

Because the 2524 displays little information in the "Comm" Mode and automatically switches to it for call-ins, you should not normally switch modes manually. However, you will have to switch to the "Comm" mode before you can begin certain "Comm" functions (and to the clock mode for its functions).

Press **Clock/Comm** to toggle the operation modes.

- The "Clock" or "Comm" LED will light to show which mode the 2524 is currently in, and the display will change, as described in the introduction to this subsection.

Clock Mode

Run-Mode Displays

While the 2524 is in the Clock Run Mode, its front-panel windows and LEDs will display the following information:

- ✓ The "Mode" window will show "0."
- ✓ The "Time" window will show the current time.
- ✓ The "AM" or "PM" LED will be lit (if the 2524 is in the 12-hour mode).
- ✓ Each "Zone/Output" LED will light whenever its corresponding output is active for an "event" (time tones, music during a class change, running equip-

ment), paging, or clock-correction activities.

- ✓ The appropriate "Days" LED will be lit.
- ✓ The "Sched" (Schedule) window will show which schedule is currently running.
- ✓ The "Music" LED will light if a music event is running.
- ✓ The "Clock" LED will be lit.

Show the Date

To display the date on the front panel, hold in **Enter**.

- The "Time" window will show the month and day. Releasing **Enter** will return the normal display.
