

## 2524 ChronoCom™ Master Clock and Intercom Controller Installation

RAULAND-BORG CORPORATION • 3458 West Oakton Street, Skokie, Illinois 60076-2951 • (708) 678-8900

### General Information

#### Description

The Rauland 2524 combines the full features of a master clock with intercom control functions. As a master clock, it can correct virtually any secondary clocks and control up to 350 "events" (such as ringing bells or turning lights and equipment on and off). As an intercom control center, it enables a user to "dial" room speakers, displays the number of a room calling in, and provides software zones for bell tones and paging. For security applications, it can automatically check the wiring to room stations every hour (or manually at any time) and enable an intercom user to monitor selected rooms in order to listen for disturbances.

The unit's LEDs and keypad make it easy to enter and check all programming. Of special note is the ease with which any part of the programming can be accessed and

changed without having to cycle through many other parts and without having to re-enter everything else.

#### Unpacking

The 2524 is shipped with all the hardware needed to mount it in a rack. Locate the following items before discarding the packing material:

### Planning

The attached wiring diagrams show typical installations for the 2524: used as a master clock only, and used in typical clock-and-intercom applications. You will also find helpful information in the next subsection, "Accessories."

#### Accessories

What may require closer attention in more complex installations is the wiring to the 2524's "Zone/Output"

terminals. For a thorough explanation of "zones," consult the **2524** programming manual, KI-1629. Briefly remember that outputs used for clock corrections or equipment control cannot be used for other "events," such as clock tones and music on class changes. You will also need to coordinate the wiring of secondary clocks with the "Mode A" and clock-code programming mode. Be sure to set out
