Bilingualism has a lot of benefits and positive effects on a person After decades of research on the effects of bilingualism on children's development there are things that just prove that According to D pke 1994 1 bilingual children have been found to learn to read more quickly and more effectively to be able to use language in a more flexible ways to be more expressive and to be able to reflect upon language use at an earlier age than do monolingual children The diploma thesis consists of two parts In the theoretical part I described some of the basic parental methods which are used in order to raise a bilingual child

When you are using the one parent one language method the result is always that children switch among languages with such an ease From that a code mixing could appear Also you could never be equally exposed to both languages due to various factors and somehow one becomes stronger the other weaker In the empirical part I wanted to check the children who are learning English simultaneously and monolingual children who are learning English as a second language sequentially by giving them a test to write in order to find out who is more proficient in English language and who can apply it better I was also interviewing the mother of the two boys who has the most important role in their lives how did she start with the project of the bilingualism that feels so natural and what is the key to the success Maximize Your Child's Bilingual Ability Adam Beck,2016-05-06 Adam Beck founder of the popular blog Bilingual Monkeys and the lively forum The Bilingual Zoo provides a roadmap to greater success and joy raising bilingual kids in this practical and comprehensive guide for parents and teachers A longtime practitioner of bilingual development in children Beck shares the best of his personal experience as an educator and parent offering a wealth of actionable advice in his engaging and empowering book page 4 of cover
