Radio Soundings Liz Gunner, 2019-01-31 Zulu Radio in South Africa is one of the most far reaching and influential media in the region currently attracting around 6.67 million listeners daily. While the public and political role of radio is well established, what is less understood is how it has shaped culture by allowing listeners to negotiate modern identities and fast changing lifestyles. Liz Gunner explores how understandings of the self, family and social roles were shaped through this medium of voice and mediated sound. Radio was the unseen literature of the auditory, the drama of the airwaves and thus became a conduit for many talents squeezed aside by apartheid repression. Besides Winnie Mahlangu and K. E. Masinga, among other talents, the exiles Lewis Nkosi and Bloke Modisane made a network of identities and conversations which stretched from the heart of Harlem to the American South, drawing together the threads of activism and creativity from both Black America and the African continent at a critical moment of late empire. *National Geographic Traveler: South Africa, 2nd Edition* National Geographic, 2013. Covering all the best known sights, lesser known ones as well, this guidebook features in-depth write-ups highlighting South Africa's cultural, historical, contemporary subjects.

Language Interrupted John McWhorter, 2007-06-18. Foreigners often say that English language is easy. A language like Spanish is challenging in its variety of verb endings, the verb 'speak' is conjugated (*hablo, hablas, hablamos*) and gender for nouns, whereas English is more straightforward: I speak, you speak, we speak. But linguists generally swat down claims that certain languages are easier than others since it is assumed all languages are complex to the same degree. For example, they will point to English's use of the word *do*. Do you know French? This usage is counter-intuitive and difficult for non-native speakers. Linguist John McWhorter agrees that all languages are complex but questions whether or not they are all equally complex. The topic of complexity has become a hot issue in recent years, particularly in creole studies, historical linguistics and language contact. As McWhorter describes, when languages came into contact over the years, when French speakers ruled the English for a few centuries or the Vikings invaded England, a large number of speakers are forced to learn a new language quickly, and this came up with a simplified version, a pidgin. When this ultimately turns into a real language, a creole, the result is still simpler and less complex than a non-interrupted language that has been around for a long time. McWhorter makes the case that this kind of simplification happens in degrees and criticizes linguists who are reluctant to say that, for example, English is simply simpler than Spanish for socio-historical reasons. He analyzes how various languages that seem simple but are not creoles actually are simpler than they would be if they had not been broken down by large numbers of adult learners. In addition to English, he

looks at Mandarin Chinese Persian Malay and some Arabic varieties His work will interest not just experts in creole studies and historical linguistics but the wider community interested in language complexity **Defining Creole** John H.

McWhorter,2005-02-03 A conventional wisdom among creolists is that creole is a sociohistorical term only that creole languages share a particular history entailing adults rapidly acquiring a language usually under conditions of subordination but that structurally they are indistinguishable from other languages The articles by John H McWhorter collected in this volume demonstrate that this is in fact untrue Creole languages while complex and nuanced as all human languages are are delineable from older languages as the result of their having come into existence only a few centuries ago Then adults learn a language under untutored conditions they abbreviate its structure focusing upon features vital to communication and shaving away most of the features useless to communication that bedevil those acquiring the language non natively When they utilize their rendition of the language consistently enough to create a brand new one this new creation naturally evinces evidence of its youth specifically a much lower degree of the random accretions typical in older languages which only develop over vast periods of time The articles constitute a case for this thesis based on both broad cross creole ranges of data and focused expositions referring to single creole languages The book presents a general case for a theory of language contact and creolization in which not only transfer from source languages but also structural reduction plays a central role based on facts whose marginality of address in creole studies has arisen from issues sociopolitical as well as scientific For several decades the very definition of the term creole has been elusive even among creole specialists This book attempts to forge a path beyond the inter and intra disciplinary misunderstandings and stalemates that have resulted from this and to demonstrate the place that creoles might occupy in other linguistic subfields including typology language contact and syntactic theory

State of Peril Lucy Valerie Graham, 2015 Considering fiction from the colonial era to the present State of Peril offers the first sustained scholarly examination of rape narratives in the literature of a country that has extremely high levels of sexual violence Lucy Graham demonstrates how despite the fact that most incidents of rape in South Africa are not interracial narratives of interracial rape have dominated the national imaginary Seeking to understand this phenomenon the study draws on Michel Foucault's ideas on sexuality and biopolitics as well as Judith Butler's speculations on race and cultural melancholia Historical analysis of the body politic provides the backdrop for careful close readings of literature by Olive Schreiner Sol Plaatje Sarah Gertrude Millin Njabulo Ndebele J M Coetzee Zo

Wicomb and others Ultimately State of Peril argues for ethically responsible interpretations that recognize high levels of sexual violence in South Africa while parsing the racialized inferences and assumptions implicit in literary representations of bodily violation **South African Panorama** ,1956
