

Ramsey Micro-Tech Electronic Integrators

Integrator

The Micro-Tech 2000 and 2100 are designed for easy operation and calibration with a large, easy-to-read display; straightforward, tactile-touch keyboard; and software that prompts you, step by step, through the proper set-up and operational procedures.

All data and user instructions are displayed on a bright, six-line character alphanumeric, vacuum-fluorescent display. This display and keypad are used for all interfacing and data entry. Two model options allow you to choose the one that's right for your needs.

The Micro-Tech 2001 is designed for general belt scale applications with only basic external communication requirements. The Micro-Tech 2100 is UL approved and has greater digital I/O capabilities, which can be expanded as need arises.

Micro-Tech 2000 Field Mount (back) shown with Micro-Tech 2101 Panel Mount (front)

The 2000 contains two expansion slots and is available in field mount only. The 2100 contains five expansion slots for increased input/output and is available in panel or field mount.

Micro-Tech Advantages

- **Part of Micro-Tech 2000 Series**
Common operation, set-up and calibration reduces operator training.
- **Digital electronics**
Provide accurate, drift-free performance.
- **Auto zero**
With a simple keystroke, the integrator can automatically compute and install a new zero.
- **Auto zero tracking**
This feature initiates the auto zero function whenever the conveyor belt runs empty.
- **Auto span**
Lets you use our electronic calibration standard on all units, or an applied test load such as a chain, test weight, or material load.
- **Calibration interval reminder**
Operator selectable. Automatically reminds you when it's time to recalibrate.
- **Linearization**
Provides linear output over the operating range. Improves the accuracy of the belt scale over full operating range, producing the same accuracy at 25% or at 100% of capacity.
- **Numerous programmable features**
Lets the user customize the integrator to fit their individual requirements.
- **Selectable analog outputs**
For rate, load or speed display.
- **Selectable analog output delay**
The delay can be programmed to either time or length of belt travel, providing you with greater flexibility and control.
- **Programmable digital inputs**
Lets operator custom program the integrator to accept inputs and/or indicator from various equipment such as alarms, printers, etc.
- **Programmable digital outputs**
Lets operator program up to three outputs to provide various information and/or activate auxiliary equipment.

Fieldbus Capabilities

We have licensed technology from Allen Bradley permitting direct "Blue Box" connection to the Allen Bradley I/O network. The Micro-Tech 2000 can interface with Modbus, Allen Bradley DF's or Siemens 3964 protocols.

Independent adjustments of analog output and display damping

Lets you adjust display without affecting sensitivity of output signal used for control purposes.

Multi-level password protection

Provides varying levels of security for operator access.

CE Approval

Meets or exceeds January 1994 European market standards. Extraordinary protection from EMI, ESD and ESD. Prevents downtime and maintains operating integrity.

Incline compensation

Can be used in conjunction with a slope sensor to automatically compensate the belt scale output for changes in conveyor angle.

Moisture compensation

Can be used in conjunction with a moisture meter to automatically compensate the belt scale output.

Loadout (Optional)

Controls the weight of material delivered to trucks, rail cars, barges or ships.

Retractable

Easy to upgrade all types of older Ramsey integrators and most competitive brands.

Dual speed sensor inputs

For belt slippage detection (Model 20-010)

Performance Guarantee

On factory approved installations, we warrant that the Series 20 Belt Scale System will weigh and totalize to a value within $\pm 1/2\%$ of the test value when calibrated against a known test weight, chain, or our standard electronic calibration.
