

## Seven Day Pulsed Electronic Timeswitch

Model 841 - Single Channel

Model 842 - Two Channel

*Danfoss*

## User Instructions

### DESCRIPTION

Model 841 is a single channel unit.

Model 842 is a two channel unit. The two channels operate totally independently of each other and can have different programmes set.

Both the models have a number of common features as described below:

The **Day** and **Time** are displayed as five digits on the liquid crystal display (LCD).

The first digit in its separate window marked **Day** will be numerical from 1 to 7 which may be allocated in sequence to the days of the week at the user's discretion. The normal convention is Monday = 1, Tuesday = 2 ..... Sunday = 7.

The remaining four digits in the window marked **Time** will display the time to a resolution of one minute from 0000 to 2359.

A short 'bleep' will be heard if a keypad is pressed. In addition, when a numeric keypad is pressed the associated digit on the LCD will either blink or change.

The 3 position selector switch (one for each channel on Model 842) may be set to **OFF** to override the programme or may be set to **Auto** to follow the programme which has been set. The third position marked **Manual** is a continuous ON but only as long as the switch is held down.

The output status indicator light will be illuminated when the selector switch is at **Auto** and a programme event occurs, or when the selector switch is held in the **Manual** position.

The unit can be set at time of installation to provide either an ON duration from 1 to 15 seconds in half second pulses, or a continuous pulse from 1 to 15 seconds. In the case of Model 842 each channel can be set to different pulse types but of the same duration.

It is recommended that the key be removed from the keyswitch to prevent unauthorised or accidental changes to the settings. The key can only be removed when in **Auto** position.

### CUTIONS

The unit operates at mains voltage and should only be opened by a qualified engineer after disconnection from the mains supply.

### TIME OF DAY

The mains electricity supply must be ON, the key inserted and turned to **Set Time** position before carrying out the operations detailed below.

When the timeswitch is first connected, or when the battery has been allowed to discharge fully, and the mains electricity supply is switched ON a dash (—) will be displayed in each of the five digit positions.

Decide which day of the week you wish to assign as Day 1.

Press the number key representing the current day of the week (listen for the 'bleep').

Key in the time using four keypad e.g. 8:30 a.m. must be keyed as

8 . 3 0

and 6:15 p.m. as

7 . 1 5

The unit will not allow the entry of a spurious day or time e.g. day 8 will not be accepted nor will a time entry of 2600. Depression of an out of range key will not register on the display; the LCD digit will blink but remain unchanged until an acceptable number is keyed.

### DO NOT PRESS ANY FUNCTION KEYPADS.

Returning the key to the **Run** position will enter the time shown on the display.
