**Rank Hypocrisies** Derek Sayer, 2014 Few decisions are as consequential for the funding and reputation of Britain's universities as those of REF panels Not only do REF rankings determine the levels of research funding universities receive from the state They equally affect institutions ability to attract external grants top flight faculty and graduate students Whatever benefit the UK's periodic research assessment exercises may have brought to research productivity the REF has been widely criticized for its enormous costs in taxpayers money and academics time its discouragement of innovative and especially interdisciplinary research and its negative effects on collegiality and staff morale Derek Sayer extends these arguments notably through his discussion of the questionable staff selection processes used in REF2014 within his own university

**Rank Hypocrisies** Derek Sayer, 2014-12-03 In crystalline text steeped in cold rage Sayer takes aim at the REF's central claim that it is a legitimate process of expert peer review He critiques university and national level REF processes against actual practices of scholarly review as found in academic journals university presses and North American tenure procedures His analysis is damning If the REF fails as scholarly review how can academics and universities continue to participate And how can government use its rankings as a basis for public policy Tarak Barkawi London School of Economics Sayer makes a compelling argument that the Research Excellence Framework is not only expensive and divisive but is also deeply flawed as an evaluation exercise Rank Hypocrisies is a rigorous and scholarly evaluation of the REF yet written in a lively and engaging style that makes it highly readable Dorothy Bishop University of Oxford Few decisions are as consequential for the funding and reputation of Britain's universities as those of REF panels Not only do REF rankings determine the levels of research funding universities receive from the state They equally affect institutions ability to attract external grants top flight faculty and graduate students Whatever benefit the UK's periodic research assessment exercises may have brought to research productivity the REF has been widely criticized for its enormous costs in taxpayers money and academics time its discouragement of innovative and especially interdisciplinary research and its negative effects on collegiality and staff morale Derek Sayer extends these arguments notably through his discussion of the questionable staff selection processes used in REF2014 within his own university Where Rank Hypocrisies goes beyond previous critiques is in its open challenge to the REF's claim to provide expert review of the outputs the very heart of its legitimacy Examining the composition and operation of REF disciplinary subpanels in forensic detail Sayer paints a picture in which overburdened assessors assign vaguely defined grades in fields that are frequently not their own while ignoring all external indicators of the academic influence of the publications they are appraising and then shred all records of their deliberations Judged against international norms of peer review the REF is an elaborate charade and an insult to the core values of the academy

Cambridge Economics in the Post-Keynesian Era Ashwani Saith, 2022-11-11 This book chronicles the rise and especially the demise of diverse revolutionary heterodox traditions in Cambridge theoretical and applied economics investigating both

the impact of internal pressures within the faculty as also the power of external ideological and political forces unleashed by the global dominance of neoliberalism Using fresh archival materials personal interviews and recollections this meticulously researched narrative constructs the untold story of the eclipse of these heterodox and post Keynesian intellectual traditions rooted and nurtured in Cambridge since the 1920s and the rise to power of orthodox mainstream economics Also expunged in this neoclassical counter revolution were the structural and radical policy oriented macro economic modelling teams of the iconic Department of Applied Economics along with the atrophy of sociology development and economic history from teaching and research in the self purifying faculty This book will be of particular interest to researchers in the history of economic thought sociology of knowledge political economy especially those engaged in heterodox and post Keynesian economics and to everyone wishing to make economics fit for purpose again for negotiating the multiple economic social and environmental crises rampant at national and global levels     *Destructive Leadership in the Workplace and its*

*Consequences* Vicki Webster, Paula Brough, 2021-11-24 With relevance across public private and not for profit sectors and combining perspectives from both the business and psychology worlds this book is a cross disciplinary look at how destructive leaders can impact organisations and their workers and how best to recognise and deal with them This text bridges the gap between the theory and the practical application by taking the academic research and translating this for students managers and practitioners in the field into practicable interventions they can use in their everyday practice to recognise and resolve issues raised by destructive leaders Using case studies throughout this guide takes the theory and places it in the real world helping readers take the theory beyond the page and apply it to their practice     *Liberalism in Neoliberal Times* Alejandro Abraham-Hamanoiel, Des Freedman, Gholam Khiabany, Kate Nash, Julian Petley, 2017-06-09 An exploration of the theories histories practices and contradictions of liberalism today What does it mean to be a liberal in neoliberal times This collection of short essays attempts to show how liberals and the wider concept of liberalism remain relevant in what many perceive to be a highly illiberal age Liberalism in the broader sense revolves around tolerance progress humanitarianism objectivity reason democracy and human rights Liberalism s emphasis on individual rights opened a theoretical pathway to neoliberalism through private property a classically minimal liberal state and the efficiency of free markets In practice neoliberalism is associated less with the economic deregulation championed by its advocates than the re regulation of the economy to protect financial capital Liberalism in Neoliberal Times engages with the theories histories practices and contradictions of liberalism viewing it in relation to four central areas of public life human rights ethnicity and gender education and the media The contributors explore the transformations in as well as the transformative aspects of liberalism and highlight both its liberating and limiting capacities The book contends that liberalism in all its forms continues to underpin specific institutions such as the university the free press the courts and of course parliamentary democracy Liberal ideas are regularly mobilized in areas such as counterterrorism minority rights privacy and the pursuit of knowledge

This book contends that while we may not agree on much we can certainly agree that an understanding of liberalism and its emancipatory capacity is simply too important to be left to the liberals Contributors Alejandro Abraham Hamanoiel Patrick Ainley Abdullahi An Na'im Michael Bailey Haim Bresheeth Bakal David Chandler William Davies Costas Douzinas Natalie Fenton Des Freedman Roberto Gargarella Priyamvada Gopal Jonathan Hardy John Holmwood Ratna Kapur Gholam Khiabany Ray Kiely Monika Krause Deepa Kumar Arun Kundnani Colin Leys Howard Littler Kathleen Lynch Robert W McChesney Nivedita Menon Toby Miller Kate Nash Joan Pedro Caraana Julian Petley Anne Phillips Jonathan Rosenhead Annabelle Sreberny John Steel Michael Wayne Milly Williamson

Slow Scholarship Catherine E. Karkov, 2019

A powerful claim for the virtues of a more thoughtful and collegiate approach to the academy today This book offers a response to the culture of metrics mass digitisation and accountability as opposed to responsibility or citizenship that has developed in higher education world wide as exemplified by the UK's Research Excellence Framework exercise REF and the increasing bureaucracy that limits the time available for teaching research and even conversation and collaboration Ironically these are problems that will be solved only by academics finding the time to talk and to work together The essays collected here both critique the culture of speed in the neoliberal university and provide examples of what can be achieved by slowing down by reclaiming research and research priorities and by working collaboratively across the disciplines to improve conditions They are informed both by recent research in medieval studies and by the problematic culture of twenty first century higher education The contributions offer

very personal approaches to the academic culture of the present moment Some tackle issues of academic freedom head on others more obliquely but they all have been written as declarations of the academic freedom that comes with slow thinking slow reading slow writing and slow looking and the demonstrations of its benefits CATHERINE E KARKOV is Professor and Chair of Art History at the University of Leeds Contributors Lara Eggleton Karen Jolly Chris Jones James Paz Andrew Prescott Heather Pulliam
