**Genocide Or Ethnocide, 1933-2007** Bartolomé Clavero, 2008

*The Biographical Landscapes of Raphael Lemkin* Piotr Madajczyk, 2023-11-03 The book is the first biography of Raphael Lemkin to draw on a comprehensive body of research into Lemkin as a person and his background and will be of interest to both non specialists and academics Drawing on archival materials a nuanced description is provided of the ethnically mixed Belarusian Polish Jewish border region where Lemkin

grew up and which shaped him clarifying at the same time some of the misinterpretations that have surrounded Lemkin's life. Lemkin's professional career and intellectual interests up to the time of his flight from Poland after the German aggression of 1939 are exhaustively described. In the latter part of the book the author poses among other things the question of how Lemkin's activities in the United States were influenced by the experience of the first almost 40 years of his life.

**Genocide and the Europeans** Karen E. Smith, 2010-10-07 Genocide is one of the most heinous abuses of human rights imaginable yet reaction to it by European governments in the post Cold War world has been criticised for not matching the severity of the crime. European governments rarely agree on whether to call a situation genocide and their responses to purported genocides have often been limited to delivering humanitarian aid to victims and supporting prosecution of perpetrators in international criminal tribunals. More coercive measures including sanctions or military intervention are usually rejected as infeasible or unnecessary. This book explores the European approach to genocide reviewing government attitudes towards the negotiation and ratification of the 1948 Genocide Convention and analysing responses to purported genocides since the end of the Second World War. Karen E. Smith considers why some European governments were hostile to the Genocide Convention and why European governments have been reluctant to use the term genocide to describe atrocities ever since.

**Genocidal Violence** Frank Jacob, Kim Sebastian Todzi, 2023-11-06 This volume offers an introduction about theoretical concepts, forms and the impact of genocidal violence. It thereby intends to serve as a source of texts that can be used in a variety of introductory courses on genocide and the violence that occurs during genocidal events. In particular, it will consequently also offer a survey on debates and recent research about the history, sociology and psychology of violence.

*Cultural Heritage and Mass Atrocities* James Cuno, 2022-09-20 A pathbreaking call to halt the intertwined crises of cultural heritage attacks and mass atrocities and mobilize international efforts to protect people and cultures. Intentional destruction of cultural heritage has a long history. Contemporary examples include the Bamiyan Buddhas in Afghanistan, mosques in Xinjiang, mausoleums in Timbuktu and Greco-Roman remains in Syria. Cultural heritage destruction invariably accompanies assaults on civilians, making heritage attacks impossible to disentangle from the mass atrocities of genocide, war crimes, crimes against humanity and ethnic cleansing. Both seek to eliminate people and the heritage with which they identify. *Cultural Heritage and Mass Atrocities* assembles essays by thirty-eight experts from the heritage, social science, humanitarian, legal and military communities. Focusing on immovable cultural heritage vulnerable to attack, the volume's guiding framework is the Responsibility to Protect (R2P), a United Nations resolution adopted unanimously in 2005 to permit international intervention against crimes of war or genocide. Based on the three pillars of prevent, react and rebuild, R2P offers today's policymakers a set of existing laws and international norms that can and, as this book argues, must be extended to the protection of cultural heritage. Contributions consider the global value of cultural heritage and document recent attacks on people and sites in China, Guatemala, Iraq, Mali, Sri Lanka and Afghanistan, Syria and Yemen. Comprehensive

sections on vulnerable populations as well as the role of international law and the military offer readers critical insights and point toward research policy and action agendas to protect both people and cultural heritage A concise abstract of each chapter is offered online in Arabic Chinese French Russian and Spanish to facilitate robust global dissemination of the strategies and tactics offered in this pathbreaking call to action The free online edition of this publication is available at [getty.edu/publications/cultural\\_heritage/mass\\_atrocities](http://getty.edu/publications/cultural_heritage/mass_atrocities) Also available are free PDF EPUB and Kindle MOBI downloads of the book

*America and the Postwar World: Remaking International Society, 1945-1956* David Mayers, 2018-03-13 The main tide of international relations scholarship on the first years after World War II sweeps toward Cold War accounts These have emphasized the United States and USSR in a context of geopolitical rivalry with concomitant attention upon the bristling security state Historians have also extensively analyzed the creation of an economic order Bretton Woods mainly designed by Americans and tailored to their interests but resisted by peoples residing outside of North America Western Europe and Japan This scholarship centered on the Cold War as vortex and a reconfigured world economy is rife with contending schools of interpretation and bolstered by troves of declassified archival documents will support investigations and writing into the future By contrast this book examines a past that ran concurrent with the Cold War and interacted with it but which usefully can also be read as separable Washington in the first years after World War II and in response to that conflagration sought to redesign international society That society was then and remains an admittedly amorphous thing Yet it has always had a tangible aspect drawing self regarding states into occasional cooperation mediated by treaties laws norms diplomatic customs and transnational institutions The U S led attempt during the first

postwar years to salvage international society focused on the United Nations Relief and Rehabilitation Administration the Acheson Lilienthal plan to contain the atomic arms race the Nuremberg and Tokyo tribunals to force Axis leaders to account the 1948 Genocide Convention the 1948 Universal Declaration of Human Rights and the founding of the United Nations None of these initiatives was transformative not individually or collectively Yet they had an ameliorative effect traces of which have touched the twenty first century in struggles to curb the proliferation of nuclear weapons bring war criminals to justice create laws supportive of human rights and maintain an aspirational United Nations still striving to retain meaningfulness amid world hazards Together these partially realized innovations and frameworks constitute if nothing else a point of moral reference much needed as the border between war and peace has become blurred and the consequences of a return to unrestraint must be harrowing

**Stalin's Soviet Justice** David M. Crowe, 2019-06-13 From the show trials of the 1920s and 1930s to the London Conference this book examines the Soviet role in the Nuremberg IMT trial through the prism of the ideas and practices of earlier Soviet legal history detailing the evolution of Stalin's ideas about the trial of Nazi war criminals Stalin believed that an international trial for Nazi war criminals was the best way to show the world the sacrifices his country had made to defeat Hitler and he together with his legal mouthpiece Andrei Vyshinsky maintained tight control over Soviet representatives during talks leading up to the creation of the Nuremberg IMT trial in 1945 and the trial itself But Soviet prosecutors at Nuremberg were unable to deal comfortably with the complexities of an open western style legal proceeding which undercut their effectiveness throughout the trial However they were able to present a significant body of evidence that underscored the brutal nature of Hitler's racial war in Russia from 1941-45 a theme which became central to Stalin's efforts to redefine international criminal law after the war Stalin's Soviet Justice provides a nuanced analysis of the Soviet justice system at a crucial turning point in European history and it will be vital reading for scholars and advanced students of the legal history of the Soviet Union the history of war crimes and the aftermath of the Second World War

Atrocity Labelling Markus P. Beham, 2022-11-03 Atrocity Genocide War crime Crime Against Humanity Such atrocity labels have been popularized among international lawmakers but with little insight offered into how and when these terms are applied and to what effect What constitutes an event to be termed a genocide or war crime and what role does this play in the application of legal proceedings Markus P Beham through an interdisciplinary and comparative approach unpicks these terms to uncover their historical genesis and their implications for international criminal law initiatives concerned with atrocity The book uniquely compares four specific case studies Belgian colonial exploitation of the Congo atrocities committed against the Herero and Nama in German South West Africa the Armenian genocide and the man made Ukrainian famine of the 1930s Encompassing international law legal history and discourse analysis the concept of atrocity labelling is used to capture the meaning underlying the work of international lawyers and prosecutors historians and sociologists agenda setters and policy makers
