the Materials Laboratory at Wright Patterson Air Force Base Approximately 400 attendees a new record representing various government agencies industry and universities participated in the technical presentations poster sessions and discussions This Review with its wide ranging interchange of technical information stands as one of the most comprehensive in the field of NDE research and engineering In order to present the reader with a more useful document we have organized the symposium papers in these Proceedings by subject rather than by the order of presentation at the Review Topical subject headings have been selected under which the large majority of papers would reasonably fall Here again we have revised the format used in former years to accommodate an evolving focus of interest in the field These categories cover a broad spectrum of research in NDE and encompass activities from fundamental work to early engineering applications In the following paragraphs we offer a brief summary of the research presented in these Proceedings

Acoustical Imaging Hua Lee, 2006-03-02 The International Symposium of Acoustical Imaging has been widely recognized as the premier forum for presentations of advanced research results in both theoretical and experimental development Held regularly since 1968 the symposium brings together the leading international researchers in the area of acoustical imaging The 24 meeting is the third time Santa Barbara hosted this international conference and it is the first time the meeting was held on the campus of the University of California Santa Barbara As many regular participants noticed over the years this symposium has grown significantly in size due to the quality of the presentations as well as the organization itself A few years ago multiple and poster sessions were introduced in order to accommodate this growth In addition the length of the presentations was shortened so more papers could be included in the sessions During recent meetings there were discussions regarding the possibility of returning to the wonderful years when the symposium was organized in one single session with sufficient time to allow for in depth presentation as well as discussions of each paper And the size of the meeting was small enough that people were able to engage in serious technical interactions and all attendees would fit into one photograph In light of the constraints of the limited budget with respect to the escalating costs it was not considered feasible
