Beyond the Tyranny of Testing Kenneth J. Gergen, Scherto R. Gill, 2020-09-28 Measurement based assessment has dominated our educational systems at the expense of the learning and the well being of students and teachers In this book Gergen and Gill propose a radical alternative to this broken system which is based instead on an inspirational conception of schools as sites of collective meaning making and a relational orientation to evaluation The authors acknowledge that it is within the process of relating that the world comes to be meaningful for us and equally learning and well being are embedded in relational process which testing and grades undermine Providing detailed illustrations using cases from pioneering schools around the globe at both the primary and secondary level this book demonstrates how a relational orientation to evaluation in education can enhance learning processes foster students engagement vitalize relationships and elevate the evaluation of teaching and the school as a whole Featuring collaborative learning dialogic pedagogy and flexible curricula relational evaluation truly speaks to the demands of a rapidly changing world

Small Sample Size Solutions Rens van de Schoot, Milica Miočević, 2020-02-13 Researchers often have difficulties collecting enough data to test their hypotheses either because target groups are small or hard to access or because data collection entails prohibitive costs Such obstacles may result in data sets that are too small for the complexity of the statistical model needed to answer the research question This unique book provides guidelines and tools for implementing solutions to issues that arise in small sample research Each chapter illustrates statistical methods that allow

researchers to apply the optimal statistical model for their research question when the sample is too small This essential book will enable social and behavioral science researchers to test their hypotheses even when the statistical model required for answering their research question is too complex for the sample sizes they can collect The statistical models in the book range from the estimation of a population mean to models with latent variables and nested observations and solutions include both classical and Bayesian methods All proposed solutions are described in steps researchers can implement with their own data and are accompanied with annotated syntax in R The methods described in this book will be useful for researchers across the social and behavioral sciences ranging from medical sciences and epidemiology to psychology marketing and economics

Transhumanism David Livingstone,2015-09-02 Transhumanism is a recent movement that extols man s right to shape his own evolution by maximizing the use of scientific technologies to enhance human physical and intellectual potential While the name is new the idea has long been a popular theme of science fiction featured in such films as 2001 A Space Odyssey Blade Runner the Terminator series and more recently The Matrix Limitless Her and Transcendence However as its adherents hint at in their own publications transhumanism is an occult project rooted in Rosicrucianism and Freemasonry and derived from the Kabbalah which asserts that humanity is evolving intellectually towards a point in time when man will become God Modeled on the medieval legend of the Golem and Frankenstein they believe man will be able to create life itself in the form of living machines or artificial intelligence Spearheaded by the Cybernetics Group the project resulted in both the development of the modern computer and MK Ultra the CIA s mind control program MK Ultra promoted the mind expanding potential of psychedelic drugs to shape the counterculture of the 1960s based on the notion that the shamans of ancient times used psychoactive substances equated with the apple of the Tree of Knowledge And as revealed in the movie Lucy through the use

of smart drugs and what transhumanists call mind uploading man will be able to merge with the Internet which is envisioned as the end point of Kabbalistic evolution the formation of a collective consciousness or Global Brain That awaited moment is what Ray Kurzweil a director of engineering at Google refers to as The Singularity By accumulating the total of human knowledge and providing access to every aspect of human activity the Internet will supposedly achieve omniscience becoming the God of occultism or the Masonic All Seeing Eye of the reverse side of the American dollar bill **Digital**

The long and short of mental time travel--self-projection over time-scales large and small James M. Broadway, Claire M. Zedelius, Jonathan W. Schooler, Simon Grondin, 2015-07-02 Researchers working in many fields of psychology and neuroscience are interested in the temporal structure of experience as well as the experience of time at scales of a few milliseconds up to a few seconds as well as days months years and beyond This Research Topic supposes that broadly speaking the field of time psychology can be organized by distinguishing between perceptual and conceptual time scales Dealing with conceptual time mental time travel also called mental simulation self projection episodic semantic memory prospection foresight allows humans and perhaps other animals to imagine and plan events and experiences in their personal futures based in large part on memories of their personal pasts as well as general knowledge Moreover contents of human language and thought are fundamentally organized by a temporal dimension enmeshed with it so thoroughly that it is usually expressible only through spatial metaphors But what might such notions have to do with experienced durations of events lasting milliseconds up to a few seconds during the so called present moment of perception action cycle time This Research Topic is organized around the general premise that by considering how mental time travel might scale down to time perception and vice versa no less progress and integrative synthesis within and across scientific domains might be facilitated Bipolar configurations of future and past orientations of the self may be repeated in parallel across conceptual and perceptual time scales subsumed by a general Janus like feedforward feedback system for goal pursuit As an example it is notable that the duality of prospection and semantic episodic memory operating at conceptual time scales has an analogue in perception action cycle time namely the interplay of anticipatory attention and working memory Authors from all areas of psychology and neuroscience are encouraged to submit articles of any format accepted by the journal Original Research Methods Hypothesis Theory Reviews etc which might speak to questions about

time and temporal phenomena at long and or short time scales Values, Economic Crisis and Democracy Mălina Voicu, Ingvill C. Mochmann, Hermann Dülmer, 2016-01-29 For the past decade European countries have undergone a severe economic crisis with severe consequences both for individuals and for governments Unemployment and rising poverty have compelled individuals to reconsider their own priorities and goals while governments have been forced to rethink social policies on the national level as well as their international economic and political agreements Some countries have been more deeply affected by the crisis than others and the impact of economic shortage on individuals and governments has differed not only because of the different magnitudes of the crisis but also because individuals react differently to the contextual changes This book makes use of cross national survey data to explore the impact of wealth and economic contexts on social values Instead of attempting to explain how aggregate changes occur as previous volumes have done the chapters in this collection focus on micro level effects to interrogate more deeply the interplay between attitudes and values and the way both can change as a result of transformation of economic context This book elaborates on several dimensions of value change the measurement model and the way it changes under the impact of economic shortage the connection between universal value orientations and attitudes towards different objects e g the welfare state immigrants and ethnic groups the effects of economic factors and vulnerability on values and attitudinal orientations how particular political and economic contexts produce changes in political orientations This book focuses on the interrelationship of social values attitudes and economic scarcity in the context of the last economic crisis experienced by many European countries It will appeal to scholars and students of sociology political science and economics *International Journal of Psychosocial Rehabilitation 20th Edition* Southern Development Group, 2017-01-23 This private NON PROFIT professional publication and associated web based information archive service is dedicated to the enhancement of practice program development program evaluation and innovations in mental health and substance abuse treatment programs worldwide Its goal is to provide a public forum for practitioners consumers and researchers to address the multiple service needs of patients and families and help determine what works for whom under a variety of circumstances The Palgrave Handbook of Literary Translation Jean Boase-Beier, Lina Fisher, Hiroko Furukawa, 2018-06-26 This Handbook offers a comprehensive and engaging overview of contemporary issues in Literary Translation research through in depth investigations of actual case studies of particular works authors or translators Leading researchers from across the globe discuss best practice problems and possibilities in the translation of poetry novels memoir and theatre Divided into three sections these illuminating analyses also address broad themes including translation style the author translator reader relationship and relationships between national identity and literary translation The case studies are drawn from languages and language varieties such as Catalan Chinese Dutch English French German Hebrew Italian Japanese Nigerian English Russian Spanish Scottish English and Turkish The editors provide thorough introductory and concluding chapters which highlight the value of case study research and explore in detail

Integral Human Development Jacquineau Azétsop, 2019-12-09 Pope Paul VI s notion of integral human development which was endorsed by his successors including Pope Francis broke with the modern project of purely economic and technological development resulting in an original understanding of development Like a conventional notion of development this theoretical construct favors economic growth technological innovation and the implementation of social programs However development is not just a socioeconomic and political issue let alone a technical one it raises

fundamentally theological questions and points to important ethical challenges Hence integral human development is a vocation at which all personal social and political activity must be directed As such it is not a social but an anthropological program Far from being a secular development theory the notion of integral human development emphasizes the religious goal of reconciling humanity and God through the creation of a human family over and above material social and economic issues Sustained by global principle and shaped by different cultural views this book brings forth the uniqueness of this approach to development examines its contribution to human welfare and anticipates the resistances it may face
