SAILOR 6301 Control Unit DSC Class A

The SAILOR 6301 Control Unit DSC Class A is a modular and flexible MF/HF radio that can be customized to your specific needs for MF/HF communication on work boats, high seas fishing vessels and merchant vessels

of all kinds. It offers simplex and semi-duplex SSB radiotelephony in the maritime mobile frequency bands from 150 kHz to 30 MHz. Services include voice transmissions, watch function, DSC operations (Distress calls, position info, Distress relay and more) and AM Broadcast reception.

The large display shows Rx and Tx frequencies and status, MMSI number, position information, system and channel properties, including indicators for transmission power and received signal strength. It is easy to read from almost all angles and the display light can be adapted to dark environments. Red text is shown on a black background providing good visibility in low light conditions while protecting night vision.

DSC operations are made using the four soft keys next to the display. The MF/HF radio can replay the last 240 s of received voice. This is a useful feature to minimize misunderstandings and to record audio when the radio is unattended. The SAILOR 6301 Control Unit has an Ethernet interface to connect to other equipment for control, monitoring and printing.

The SAILOR 6301 Control Unit is available as a basic MF DSC radio that can be upgraded with an HF DSC option and/or a telex option. Telex is sent

GMDSS Denise Bréhaut, 2017-09-21. The Global Maritime Distress and Safety System (GMDSS) is the maritime equivalent to the emergency services number, providing a fast and efficient way of calling for assistance at sea, whatever the size of craft or its location. Denise Bréhaut explains the operation of the system as a whole and clearly outlines the procedures required to get help quickly, as well as covering the syllabi of the General Operator's Certificate (GOC), the Long Range Certificate (LRC) and the Restricted Operator's Certificate (ROC). Concise descriptions of channel usage, call signs, types of transmission and equipment allow novices as well as long time users to thoroughly understand this life saving communications system. The 6th edition of GMDSS incorporates all the changes to the regulations that came into force in 2009 as well as the 2016 system updates. GMDSS: A User's Handbook has proved an invaluable reference for exam candidates and equipment users alike for almost 20 years; it is the GMDSS bible. The clear and lucid text is supported with illustrations, handy Q & A sections and a quick reference revision guide for GOC and LRC students. Since it was first published, this book has helped explain the system for anyone using GMDSS and has been excellent pre-course reading for students. *Lloyd's Register Technical Association Session 1996-1997*. Lloyd's Register Foundation, 1996-01-01. The Lloyd's Register Technical Association (LRTA) was established in 1920 with the primary objective of sharing technical expertise and knowledge within Lloyd's Register. Publications have consistently been released on a yearly basis, with a brief interruption between 1938 and 1946. These publications serve as a key reference point for best practices and were initially reserved for internal use to maximise LR's competitive advantage. Today the LRTA takes a fresh approach, focusing on collaboration by combining professional expertise from across the LRF Group to ensure a frequent output of fresh perspectives and relevant content. The LRTA has evolved into a Group-wide initiative that identifies, captures and shares knowledge spanning various business streams and functions. To support this modern approach, the LRTA has adopted a new structure featuring representatives and senior governance across the business streams and the LR Foundation. The Lloyd's Register Technical Association Papers should be seen as historical documents representing

earlier viewpoints and are not reflective of current thinking and perspectives by the current LR Technical Association The Lloyd's Register Staff Association LRSA changed its name to the Lloyd's Register Technical Association LRTA in 1973
