Philadelphia and the State of Pennsylvania Kate Boehm Jerome,2011 Collects information about the land history and people of Philadelphia and the state of Pennsylvania **Inside Flyer** ,2010 **An Absence of Competition** Neil Longley,2013-12-11 This book takes a multi disciplinary approach to analyzing the nature of competition and competitive advantage within the U S pro sport industry By many measures the four major pro sports leagues in the U S the National Football League NFL National Basketball

Association NBA National Hockey League NHL and Major League Baseball MLB are now some of the most successful business entities in the country While these established leagues have generally been highly profitable throughout their respective existences the past two decades have been particularly lucrative with franchise values in all four leagues growing rapidly and at levels well beyond market rates of return Within this context the book seeks to explore the nature of the competitive advantage that these leagues apparently possess The purpose is to identify not only how these leagues have been able to get to where they are today but also to examine the competitive threats and opportunities that these leagues face as they move forward A key contribution of the book is that it analyzes these issues from a multi disciplinary approach including a traditional economics perspective public policy and public choice theory and strategic management to provide a parallel explanation for the success of each of the four major leagues It argues that no single conceptual approach can in itself adequately explain the full richness of the issue Its stresses that these various approaches should generally be viewed as complements rather than as being mutually exclusive and that a full understanding of the issue requires one to adopt a multi disciplinary perspective making it of interest to scholars in strategic management sport management and economics It can serve as an effective teaching tool in both graduate and upper level undergraduate courses for students in these fields and is particularly useful for faculties seeking to emphasize to their students the importance of a multi disciplinary integrative approach when analyzing business and management issues The book may also be of interest to leaders within the sport industry itself and will help to provide insight and perspective as leagues seek to enhance their competitive advantage in the marketplace
