embraced 15 years ago but now seem to be part of the everyday thought process of many sensory scientists And yet some things stay the same Sensory testing will always involve human participants Humans are tough measuring instruments to work with They come with varying degrees of acumen training experiences differing genetic equipment sensory capabilities and of course different preferences Human foibles and their associated error variance will continue to place a limitation on sensory tests and actionable results Reducing controlling partitioning and explaining error variance are all at the heart of good test methods and practices **Wisconsin Junior Dairymen's Association** Wisconsin Junior Dairymen's Association,1982 *Southwestern Journal of Grain, Flour, Coal* ,1920 *Contributions to Education* ,1923
