

## **TRANSPORTATION PROPOSAL FOR 2021-2022 SCHOOL YEAR**

Re: Suggested modification of enrollment procedures to improve transportation services.

To: USD #469 Board of Education and Superintendent Dan Wessel

From: Jim Slapper, Transportation Services Director

Date: March 8, 2021

This proposal will specify past transportation service concerns and suggest modifications to help resolve those issues and better provide transportation for eligible students.

### **Goals**

1. Increase safety for all students transported.
2. Better communication between parents and school staff pertaining to transportation.

### **Historical Overview:**

Enrollment procedures result in a significant distortion of the number of students entitled to/needing/prepared to utilize transportation services. In the past, the number of students requesting services at time of enrollment has been skewed much higher than students utilize our transportation service.

Under such circumstances, transportation services have experienced serious problems planning for the number of students to be transported, appropriate bus stop locations and allocation of transportation staff and material resources and planning. Currently all enrolled students are entitled to free transportation services except for those specifically excluded by policy. Those not eligible include students within a walk zone and students residing out-of-district.

### **2019-2020 School Year Experience:**

During the school enrollment process form on Skyward, parents can mark a box if they believe their student needs transportation services. Parents enrolling their students for transportation services can do so at any time before and after the first day of school. There is no cutoff date.

During the 2019-2020 school year enrollment process, 1,774 students were checked yes as needing and/or wanting transportation services. Included in that number were students not eligible for transportation, such as out of district students and students who live in a walk zone.

On the first week of school that year, only 802 of the 1,774 students requesting transportation services, scanned their cards and boarded a bus. That means 972 students were included in our planning for rides and stops. When setting up routes and bus stops, we plan for 1,774 students, but hoped not all that number showed up at the bus stops. (If all 1,774 needed a ride we would not have had enough resources to transport all those students to and from school.)

**Marketing and the Customer Value Chain** Thomas Fotiadis, Dimitris Folinas, Konstantinos Vasileiou, Aggeliki Konstantoglou, 2022-02-28 Marketing and supply chain management have a symbiotic relationship within any enterprise and together they are vital for a company's viability and success. This book offers a systemic approach to the integration of marketing and supply chain management. It examines the strategic connections and disconnections between supply chain and operations management and marketing by focusing on the factors that constitute the extended marketing mix including product, price, promotion, people, and processes. Key aspects of supply chain management are discussed in detail including material handling, unit load handling systems and equipment, as well as warehousing and transportation design and packaging. The book then goes on to explore the marketing functions of intangible products/services followed by a focus on B2B markets. Throughout there is a strong emphasis on the optimization and maximization of the value chain through the development of a systems approach with a market orientation. Pedagogy that translates theory to practice is embedded throughout including theoretical mini cases, chapter by chapter objectives and summaries. **Marketing and the Customer Value Chain** will help advanced undergraduate and postgraduate students appreciate how front-end marketing can interface with the back-end operations of supply chain management.

**Business Administration for Students & Managers** Lawrence Mensah Akwetey, 2011 In recent times there has been an unprecedented increase in awareness of environmental issues by businesses around the globe. The extent to which this awareness has been created hinges significantly on the customer's perception of businesses' responses to environmental issues such as climate change, global warming, effects of business gas emissions on the ozone layer, etc. The growth of some businesses and indeed the whole industrial society has been based on the confidence reposed in human ingenuity and its ability to develop new technologies to meet human needs and more recently to solve the climate and environmental problems brought about by previous technological developments, particularly those used by businesses and giant industrial houses. In essence the question that all the above brings to the fore is: should the approach of businesses to these objectives of continued and sustainable growth be at the expense of our climate or the environment? One of the primary reasons why businesses use more nuclear power plants for their energy supplies today is to combat global warming and climate change as nuclear power is said to be relatively free of carbon emissions. **Business Administration for Students & Managers** covers various topics traversing eight major subject areas in Business Administration including The International Business Environment, Human Resource Management, Financial Management and Marketing Management, Managing Operations and Information Communication Technology, Business Process Reengineering and Logistics, Supply Chain Management. This approach is intended to bring together for the benefit of all students and managers of businesses all the major business topics/functions under one umbrella. **Business Administration for Students & Managers** is intended for the first international business courses of study at both the undergraduate and the Master of Business Administration (MBA) levels. It holds the key to the efficient

business or management remits of business personnel such as Chief Executive Officers Managing Directors General Managers Company Secretaries and Corporate Board of Directors Others include the functional managers of businesses or organisations such as Finance Environmental Protection Information Technology Human Resource Production Marketing and Operations managers *Plunkett's Transportation, Supply Chain & Logistics Industry Almanac* Jack W. **Global Production Networks** Neil M. Coe, Henry Wai-Chung Yeung, 2015 Globalization and supply chains have re shaped the organization of the global economy in to global production networks The authors provide a clear framework for understanding these developments **Port Operations, Planning and Logistics** Khalid Bichou, 2014-04-16 Port Operations Planning and Logistics offers detailed analysis of world port systems by applying both theoretical and practical managerial approaches to port operations management and policy The author draws from a rare combination of extensive cross management professional experience and established multidisciplinary academic expertise to provide a structured publication that cuts across different research fields economics engineering operations technology management strategy and policy The book explores various port topics including ICT and technology applications investment and financing pricing and asset management contracts regulations safety security and environmental management Each is supported with case studies and practical examples of the latest developments in the field **Transportation Journal**, 2004 **Freight Forwarder's Intermediary Role in Multimodal Transport Chains** Hans-Joachim Schramm, 2012-01-05 In this book the business of international freight forwarding is examined from both a theoretical and empirical point of view with a special emphasis on multimodal transport chains including sea or air transport operations In such contexts the freight forwarder is always considered The Architect of Transport but this intermediary role seems to be largely neglected in research to date Therefore relevant concepts from economic theory and economic sociology are employed to produce both an intermediary and a network perspective of freight forwarding in order to provide a better understanding of this kind of transportation business Furthermore its intermediary role in such inherent network structures is explored by mapping relationship patterns in a stylized model framework applied to a questionnaire based sample collected among freight forwarders engaged in such multimodal transport chains in Germany especially from Hamburg Bremen and Bremerhaven as well as in Austria in 2003
