

Autobiography Rough Draft

My name is Samantha Rose Peluchette and I was born 12 weeks premature on January 3, 1992 in Allegheny General Hospital at 9:36 pm. When I was born I weighed 2 lbs. 13 oz. and I could fit in my dad's hand. My mother, Hope Edwards, was 15 years old and my dad, Daniel Peluchette, was 19 years old. I was in the hospital in an incubator until April because I was born so early.

My mother grew up in Wexford, Pa and went to Pine Richland High School. My dad grew up in Saxonburg, Pa and went to Deer Lakes High School. My grandma, great-grandparents, aunts, and uncles on my mother's side of the family still live in or around Wexford. My mom's father lives in New Castle, Pa. My dad's parents both passed away before I met them, but they lived in Saxonburg, Pa. My dad's brother lives in Tarentum and my dad's aunts and uncles and my great-grandma live in Grove City, Pa. On my mother's side, my great-grandma was Slovakian and my great-grandpa was Polish, German, and Native American. On my dad's side of the family, everyone is Italian. On my mom's side of the family, everyone has been living in western Pennsylvania for as long as any of us can remember, but my grandma says that my great-great-great-grandparents came to America from Poland and Germany. On my dad's side of the family I don't know very many of my family members, so I'm not sure how they came to live in Grove City, Pa.

After I was born, my mom and dad separated and I went to live with my great-grandma until I was seven years old. While I lived with my great-grandma, I went to North Allegheny School District, went to a Baptist church every Sunday, and played with my friends. When I was seven, I moved in with my mom and my now step-dad, Jim. This

Mos, 2009-06-12 Since the 17th century autobiography has an honorable place in the study of history In 1930 the preeminent historian of psychology Edwin Boring writes that a science separated from its history lacks direction and promises a future of uncertain importance To understand what psychology is and what it is becoming the autobiographies of famous psychologists is history at its best Here we find model inquirers of the science who offer a

personalized account of themselves and their vocation in the context of the history of the science. What is characteristic of many of those who have contributed to an alternate vision of psychological science is that they never considered themselves or were considered by others as belonging to the mainstream of the discipline. In considering an alternative history of psychology in autobiography, the editor invited contributors whose research and writings have pushed the discipline in other directions, pushed its limits, and whose scholarship finds its philosophical framework outside the discipline altogether. If these contributors may not be model inquirers, their scholarship is very much a matter of consequence for those who wish to understand psychology. Among the outliers included here are those who devoted themselves to the writing of psychology, examining its history, theories, research, and professional practices, and who enthusiastically embraced over the course of their lives the discipline as a human science. Their influence has been subtle, as has been their appeal to many students who, with affection for the discipline, find its promise in a discerning self-awareness and a critical understanding of others and their worlds. This volume is not simply a collection of personal chronologies which might inspire or lend appreciation to a younger generation. Our contributors write from their personal and professional experience, of course, but they write of their thinking and understanding of the psyche as an aspect of human life, of psychology as an academic form of human sciences inquiry, and so bring to bear their scientific and philosophical imagination to their personal challenges in their chosen vocation as psychologists. Our contributors cover a broad swath of the second half of the 20th century, the century of psychology. Nurturing the discipline from within various philosophical, social, political, and cultural roots, their autobiographies exemplify marginality, if not alienation from the mainstream, even as their professional and personal lives give expression to engaged scholarship, commitment to vocation, and straightforwardly and reflectively, a love of the heart. From Germany, Carl Graumann; from France, Erika Apfelbaum; from Canada, David Bakan and Kurt Danziger; and from the United States, Amedeo Giorgi, Robert Rieber, and Joseph Rychlak relate their lives to the larger contexts of our times. Their personal stories are an integral part of the historiography of our discipline. Indeed, a contribution to the historiography of our discipline is constituted in their autobiographical self-presentations, for their writings attest as much to their lives as model inquirers as they do to the possibility of psychology as a human science.

Theoretical Perspectives on Autobiographical Memory M.A.

Conway, David C., Rubin, Hans, Spinnler, Willem A., Wagenaar, 2013-04-17. The meeting Theoretical Perspectives on Autobiographical Memory was held at the Grange Hotel, Grange-over-Sands in the Lake District region of North Western England, July 1991. The workshop was financed by a generous grant from the NATO Scientific Affairs Division under the Advanced Research Workshop programme, and without this funding the meeting would not have been possible. The organisers and delegates gratefully acknowledge the support of the NATO Advanced Research Workshops programme. Thirty-five scientists from five different NATO countries attended the workshop, and twenty-seven delegates presented papers. The two aims of the workshop were to bring together in one forum a number of comparatively separate approaches to

autobiographical memory and to promote theory in the area generally These aims were fulfilled in the presentations and discussions particularly the final discussion session in which delegates focussed on the central issues of the nature structure and functions of autobiographical memory and how these emerge in different research areas The present volume contains the papers arising from the workshop We thank Mrs Sheila Whalley for secretarial help and Fiona Hirst and Stephen Anderson for practical assistance in coordinating registration for the workshop

A Slot Machine, A Broken Test Tube: An Autobiography S. E. Luria, 2025-07-30 S E Luria's autobiography adds another gem to the Sloan Foundation series The molecular biologist and Nobel laureate writes with a crispness and concision that mirrors his outlook and his work He is proud of reductionist science he is committed to a life of reason to socialist ideals and political action Early on he confides also he committed himself to acquiring a musical education and later to learning and appreciating modern poets All this is told in chapters that compartmentalize the life the developing years as a Jew in a modest Turin household in pre fascist Italy the scientific achievements the teaching career the marriage emotional life political activities

Luria's chapters on molecular biology and its shapers are fine additions to the genre the fascination of the book however is in the man he presents himself with forthright honesty and integrity unexpectedly disclosing at the end that he suffered years of depressive episodes prior to drug treatment A remarkable life short on humor perhaps but abundant in courage and conviction Kirkus Luria has written a successful and unusual autobiography Luria writes well and with wry humor Science Salvador Edward Luria Nobel laureate for ground breaking work in molecular biology committed socialist political activist and sometime depressive has a remarkable life story to tell The New York Times Luria's book is an honest and unbiased exploration of himself It gives many insights to various aspects of life and is definitely a must read The reverence with which he speaks of science and his colleagues is inspiring Reading this book it feels like we actually get to know Luria He ceases to be a Nobel Prize winner and rather becomes an admirable man who has much to teach us about life Current Science The book is at once confessional and analytic of motive Organized by development rather than by calendar alone the text outlines what Luria did and who he is by describing the growth of his personal set of commitments active guides to action within this or that sphere of a long and reflective life It is easy to admire this cultivated ironic man and his lucid pointed book of an enviable life founded alike on reason and on commitment For readers who find empathy for the growth of candor and self awareness as the chapters pass admiration will be colored with a deeper cast There are no modern autobiographies and not many novels that can more reward readers young enough to find the grand choices in life still before them Scientific American Salvador Luria is one of the great pioneers of modern molecular biology a deeply committed person in science in political affairs and in other human concerns This book conveys much of his quality both as a scientist and as a person This book unusually frank and intimate in comparison to most scientific autobiographies offers an illuminating self portrait of a truly outstanding man and scientist American Scientist Well worth reading The Antioch Review

Autobiography and the Psychological Study of Religious Lives Jacob Adrianus Belzen, 2008 This volume positions itself on the cutting edge of two fields in psychology that enjoy rapidly increasing attention both the study of human lives and some core domains of such lives as religion and spirituality are high on the agenda of current research and teaching Biographies and autobiographies are being approached in new ways and have become central to the study of human lives as an object of research and a preferred method for obtaining unique data about subjective human experiences Ever since the beginning of the psychology of religion autobiographies have also been pointed out as an important source of information about psychic processes involved in religiosity In this volume a number of leading theoreticians and researchers from Europe and the USA try to bring them back to this field by drawing on new insights and latest developments in psychological theory
