Integrated Security Systems Design 2nd Edition is recognized as the industry leading book on the subject of security systems design. It explains how to design a fully integrated security system that ties together numerous subsystems into one complete, highly coordinated and highly functional system. With a flexible and scalable enterprise level system, security decision makers can make better informed decisions when incidents occur and improve their operational efficiencies in ways never before possible. The revised edition covers why designing an integrated security system is essential and how to lead the project to success. With new and expanded coverage of network architecture, physical security, information management, PSIM systems, camera technologies, and integration with the Business Information Management Network, Integrated Security Systems Design 2nd Edition shows how to improve a security program's overall effectiveness while avoiding pitfalls and potential lawsuits. Guides the reader through the strategic, technical, and tactical aspects of the design process for a complete understanding of integrated digital security system design. Covers the fundamentals as well as special design considerations such as radio frequency systems and interfacing with legacy systems or emerging technologies. Demonstrates how to maximize safety while reducing liability and operating costs.

NIST 800-171: System Security Plan (SSP) Template and Workbook Mark A. Russo, CISSP-ISSAP, CEH, 2019-01-04. THE SYSTEM SECURITY PLAN IS A CRITICAL DOCUMENT FOR NIST 800 171 AND WE HAVE RELEASED A MORE EXPANSIVE AND UP TO DATE SECOND EDITION FOR 2019A. A major 2019 NIST 800 171 development is the expected move by the Department of Justice (DOJ) against any company being held to either FAR Clause 52.204-21 DFARS Clause 252.204-7012 or both if DOJ can show the company has violated its contract; it will be subject to federal prosecution if they fail to meet NIST 800 171. Discussions of the author with key personnel working with NIST and DOJ on this matter raise the seriousness of not meeting NIST 800 171. Sources to the author are expecting in 2019 and beyond the likelihood of civil and criminal prosecution for those companies who 1. have a breach of their IT environment, 2. that data specifically Controlled Unclassified Information (CUI), Critical Defense Information (CDI) is damaged or stolen, and the 3. DOJ can demonstrate negligence by the company will result in federal prosecution. This is part of an ongoing series of Cybersecurity Self Help documents being developed to address the recent changes and requirements levied by the Federal Government on contractors wishing to do business with the government. The intent of these supplements is to provide immediate and valuable information so business owners and their Information Technology (IT) staff need. The changes are coming rapidly for cybersecurity contract requirements. Are you ready? We plan to be ahead of the curve with you with high quality books that can provide immediate support to the ever growing challenges of cyber threats to the Government and your business.
