

Given that x can vary,

(b) use calculus to find the maximum value of V , giving your answer to the nearest cm^3 .

$$2x^2 + 2xy + xy = 300$$

$$2x^2 + 3xy = 300$$

$$3xy = 300 - 2x^2$$

$$y = \frac{300}{3x} - \frac{2x^2}{3x}$$

A Biography of the Pixel Alvy Ray

Smith, 2021-08-03 The pixel as the organizing principle of all pictures from cave paintings to Toy Story The Great Digital Convergence of all media types into one universal digital medium occurred with little fanfare at the recent turn of the millennium The bit became the universal medium and the pixel a particular packaging of bits conquered the world Henceforward nearly every picture in the world would be composed of pixels cell phone pictures app interfaces Mars Rover transmissions book illustrations videogames In A Biography of the Pixel Pixar cofounder Alvy Ray Smith argues that the pixel is the organizing principle of most modern media and he presents a few simple but profound ideas that unify the dazzling varieties of digital image making Smith's story of the pixel's development begins with Fourier waves proceeds through Turing machines and ends with the first digital movies from Pixar DreamWorks and Blue Sky Today almost all the pictures we encounter are digital mediated by the pixel and irretrievably separated from their media museums and kindergartens are two of the last outposts of the analog Smith explains engagingly and accessibly how pictures composed of invisible stuff become visible that is how digital pixels convert to analog display elements Taking the special case of digital movies to represent all of Digital Light his term for pictures constructed of pixels and drawing on his decades of work in the field Smith approaches his subject from multiple angles art technology entertainment business and history A Biography of the Pixel is essential reading for anyone who has watched a video on a cell phone played a videogame or seen a movie 400 pages of annotations prepared by the author and available online provide an invaluable resource for readers **Technically**

Together Taylor Dotson, 2024-02-06 Why we should not accept networked individualism as the inevitable future of community If social interaction by social media has become the modern front porch as one sociologist argues offering richer and more various contexts for community and personal connection why do we often feel lonelier after checking Facebook For one thing as Taylor Dotson writes in Technically Together Try getting a Facebook status update to help move a couch or stay for dinner Dotson argues that the experts who assure us that networked individualism will only bring us closer together seem to be urging citizens to adapt their social expectations to the current limits of technology and discouraging them from considering how technologies could be refashioned to enable other ways of relating and belonging Dotson characterizes different instantiations of community as thick or thin depending on the facets and manifestations of togetherness that they encompass Individuating social networks are a form of community he explains but relatively thin in regard to several dimensions of communality Dotson points out that current technological practices are not foreordained but supported by

policies economic arrangements and entrenched patterns of thought He examines a range of systems organizations and infrastructures from suburban sprawl and smartphones to energy grids and cry it out sleep training for infants and considers whether they contribute to the atomization of social life or to togetherness and community vibrancy Dotson argues that technology could support multifaceted communities if citizens stopped accepting the technological status quo and instead demanded more from their ever present devices

Proceedings of the International Conference on Data Engineering and Communication Technology Suresh Chandra Satapathy,Vikrant Bhateja,Amit Joshi,2016-08-24 This two volume book contains research work presented at the First International Conference on Data Engineering and Communication Technology ICDECT held during March 10 11 2016 at Lavasa Pune Maharashtra India The book discusses recent research technologies and applications in the field of Computer Science Electrical and Electronics Engineering The aim of the Proceedings is to provide cutting edge developments taking place in the field data engineering and communication technologies which will assist the researchers and practitioners from both academia as well as industry to advance their field of study

Social Change and the Coming of Post-consumer Society Maurie J Cohen, Halina Szejnwald Brown, Philip J Vergragt, 2017-03-31 Consumer society is an unquestionably complex social construct. However, after decades of unremitting dominance, there are signs emerging that it is starting to falter both as a coherent and durable system of social organization and as a strategy for societal advancement. Debates concerning how we can transition beyond present energy and materials intensive consumer society are beginning to gain greater salience. *Social Change and the Coming of Post Consumer Society* aims to develop more complete appreciation of the relevant processes of social change and to identify effective interventions that could enable a transition to supersede consumer society. Bringing together leading interdisciplinary experts on social change, the book identifies and analyzes several ongoing small and modest scale social experiments. Possibilities for macro scale change from the interlinked perspectives of culture, economics, finance, and governance are then explored. These contributions expose the systemic problems that are emblematic of the current condition of consumer society, specifically the unsustainability of prevailing consumption practices and lifestyles and the persistence of inequalities. These observations are summarized and extended in the final chapter of the book. This volume will be of great interest to students and scholars of sustainable consumption, sustainability transitions, environmental sociology, and sustainable development.

Quantitative analysis of neuroanatomy Julian M L Budd, Hermann Cuntz, Stephen J Eglen, Patrik Krieger, 2016-03-22 The true revolution in the age of digital neuroanatomy is the ability to extensively quantify anatomical structures and thus investigate structure function relationships in great detail. Large scale projects were recently launched with the aim of providing infrastructure for brain simulations. These projects will increase the need for a precise understanding of brain structure e.g. through statistical analysis and models. From articles in this Research Topic we identify three main themes that clearly illustrate how new quantitative approaches are helping advance our understanding of neural structure and function. First, new approaches to reconstruct neurons and circuits from empirical data are aiding neuroanatomical mapping. Second, methods are introduced to improve understanding of the underlying principles of organization. Third, by combining existing knowledge from lower levels of organization, models can be used to make testable predictions about a higher level organization where knowledge is absent or poor. This latter approach is useful for examining statistical properties of specific network connectivity when current experimental methods have not yet been able to fully reconstruct whole circuits of more than a few hundred neurons.

10 Steps to Creating an Infographic Stephanie B. Wilkerson, 2024-01-08 This book provides step by step guidance for developing high quality infographics. Practical in its approach, *10 Steps to Creating an Infographic: A Practical Guide for Non designers* outlines a user friendly process for developing infographics with a clearly defined purpose and powerful message. The book shows how to approach makes infographic creation accessible for anyone who doesn't have a background in graphic design or a budget for a graphic designer. Author Stephanie B Wilkerson breaks down the complex task into a series of steps and models.
