Machine Learning Algorithms for Signal and Image Processing Deepika Ghai, Suman Lata Tripathi, Sobhit Saxena, Manash Chanda, Mamoun Alazab, 2022-12-08 Machine Learning Algorithms for Signal and Image Processing Enables readers to understand the fundamental concepts of machine and deep learning techniques with interactive real life applications within signal and image processing Machine Learning Algorithms for Signal and Image Processing aids the reader in designing and developing real world applications using advances in machine learning to aid and enhance speech signal processing image processing computer vision biomedical signal processing adaptive filtering and text processing It includes signal processing techniques applied for pre processing feature extraction source separation or data decompositions to achieve machine learning tasks Written by well qualified authors and contributed to by a team of experts within the field

the work covers a wide range of important topics such as Speech recognition image reconstruction object classification and detection and text processing Healthcare monitoring biomedical systems and green energy How various machine and deep learning techniques can improve accuracy precision rate recall rate and processing time Real applications and examples including smart sign language recognition fake news detection in social media structural damage prediction and epileptic seizure detection Professionals within the field of signal and image processing seeking to adapt their work further will find immense value in this easy to understand yet extremely comprehensive reference work It is also a worthy resource for students and researchers in related fields who are looking to thoroughly understand the historical and recent developments that have been made in the field

Cinema and Art as Archive Aa. Vv., 2015-03-11T00:00:00+01:00 As Jacques Derrida wrote in 1995 while considering Archive Fever nothing is less reliable or less clear today than the word archive Nevertheless the historic cultural dimension of the contemporary discursive practices in cinema and art develops in the semantic openendedness of the term in the repositioning of the idea of archive The individual disciplines involved in one such field history of cinema and art theory of cinema and art aesthetics semiotics philology etc begin to open up to questioning the notion of archive even in negative in other words what after Michel Foucault the archive is not or does not seem to be The archive is not the library of libraries or encyclopedia it is not memory it is not museum it is not a database In recent years the attention focused on such ideas has not so much highlighted the impulses turns and specific forms of art art archive as it has revealed in many ways how the archive concerns us in the interrelation of aesthetic political ethical and legal levels among various disciplinary fields
