Low-Power CMOS Digital Pixel Imagers for High-Speed Uncooled PbSe IR Applications Josep Maria Margarit, 2016-12-29 This book describes the development of a new low cost medium wavelength IR MWIR monolithic imager technology for high speed uncooled industrial applications It takes the baton on the latest technological advances in the field of vapor phase deposition VPD PbSe based MWIR detection accomplished by the industrial partner NIT S L adding fundamental knowledge on the investigation of novel VLSI analog and mixed signal design techniques at circuit and system levels for the development of the readout integrated device attached to the detector In order to fulfill the operational requirements of VPD PbSe this work proposes null inter pixel crosstalk vision sensor architectures based on a digital only focal plane array FPA of configurable pixel sensors Each digital pixel sensor DPS cell is equipped with fast communication modules self biasing offset cancellation analog to digital converter ADC and fixed pattern noise FPN correction In pixel power consumption is minimized by the use of comprehensive MOSFET subthreshold operation *Physical Model and Applications of High-Efficiency Electro-Optical Conversion Devices - Volume II* Feng Chi, Qiang Xu, Dan Luo, 2023-03-31

Materials for Solid State Lighting and Displays Adrian Kitai, 2016-12-15 LEDs are in the midst of revolutionizing the lighting industry Up to date and comprehensive coverage of light emitting materials and devices used in solid state lighting and displays Presents the fundamental principles underlying luminescence Includes inorganic and organic materials and devices LEDs offer high efficiency long life and mercury free lighting solutions **MH-SET Paper 1 Guide for Assistant Professor with Past Questions** Disha Experts, 2020-02-29 **Visible Light Communications** Zhaocheng Wang, Qi Wang, Wei Huang, Zhengyuan Xu, 2017-12-08 A complete and comprehensive reference on modulation and signal processing for visible light communication This informative new book on state of the art visible light communication VLC provides for the first time a systematical and advanced treatment of modulation and signal processing for VLC Visible Light Communications Modulation and Signal Processing offers a practical guide to designing VLC linking academic research with commercial applications In recent years VLC has attracted attention from academia and industry since it has many advantages over the traditional radio frequency including wide unregulated bandwidth high security and low cost It is a promising complementary technique in 5G and beyond wireless communications especially in indoor applications However lighting constraints have not been fully considered in the open literature when considering VLC system design and its importance has been underestimated That s why this book written by a team of experts with both academic research experience and industrial development experience in the field is so welcome To help readers understand the theory and design of VLC systems the book Details many modern techniques on both modulation and signal processing aspects Links academic research with commercial applications in visible light communications as well as other wireless communication systems Combines theoretical rigor with practical examples in presenting optical camera communication systems Visible

Light Communications Modulation and Signal Processing serves as a useful tool and reference book for visible light communication professionals as well as wireless communication system professionals and project managers. It is also an important guide for undergraduates and graduates who want to conduct research in areas of wireless communications.

Software Engineering And Information Technology - Proceedings Of The 2015 International Conference (SEIT2015) Xiaolong Li, 2015-12-17 This book consists of sixty seven selected papers presented at the 2015 International Conference on Software Engineering and Information Technology SEIT2015 which was held in Guilin Guangxi China during June 26-28, 2015. The SEIT2015 has been an important event and has attracted many scientists, engineers, and researchers from academia, government laboratories, and industry internationally. The papers in this book were selected after rigorous review. SEIT2015 focuses on six main areas: namely, Information Technology, Computer Intelligence, and Computer Applications, Algorithm, and Simulation, Signal and Image Processing, Electrical Engineering, and Software Engineering. SEIT2015 aims to provide a platform for the global researchers and practitioners from both academia as well as industry to meet and share cutting edge development in the field. This conference has been a valuable opportunity for researchers to share their knowledge and results in theory, methodology, and applications of Software Engineering and Information Technology.

The 1st International Conference on Advanced Intelligent System and Informatics (AISIT2015), November 28-30, 2015, Beni Suef, Egypt Tarek Gaber, Aboul Ella Hassanien, Nashwa El-Bendary, Nilanjan Dey, 2015-11-09 The conference topics address different theoretical and practical aspects and implementing solutions for intelligent systems and informatics disciplines including bioinformatics, computer science, medical informatics, biology, social studies, as well as robotics research. The conference also discusses and presents solutions to the cloud computing and big data mining, which are considered hot research topics. The conference papers discussed different topics, techniques, models, methods, architectures, as well as multi-aspect domain specific and new solutions for the above disciplines. The accepted papers have been grouped into five parts: Part I Intelligent Systems and Informatics addressing topics including but not limited to medical application, predicting student performance, action classification, and detection of dead stained microscopic cells; optical character recognition, plant identification, rehabilitation of disabled people; Part II Hybrid Intelligent Systems addressing topics including but not limited to EMG signals, text classification, geomagnetic inverse problem, email filtering; Part III Multimedia Computing and Social Networks addressing topics including but not limited to augmented reality, telepresence, robot video, flash matting, community detection, quality images, face thermal image extraction, MRI tumor segmentation; Part V Cloud Computing and Big Data Mining discussing topics including but not limited to mining on microblogs, query optimization, big data classification, access control, friendsourcing, and assistive technology; Part VI Swarm Optimization and Its Applications addressing topics including but not limited to solving set covering problem, adaptive PSO for CT liver segmentation, water quality assessment, attribute reduction, fish detection, solving manufacturing cell design problem.

Intelligent Systems Design and Applications Ajith Abraham,Aswani Kumar Cherukuri,Patricia Melin,Niketa Gandhi,2019-04-13 This book highlights recent research on Intelligent Systems and Nature Inspired Computing It presents 212 selected papers from the 18th International Conference on Intelligent Systems Design and Applications ISDA 2018 and the 10th World Congress on Nature and Biologically Inspired Computing NaBIC which was held at VIT University India ISDA NaBIC 2018 was a premier conference in the field of Computational Intelligence and brought together researchers engineers and practitioners whose work involved intelligent systems and their applications in industry and the real world Including contributions by authors from over 40 countries the book offers a valuable reference guide for all researchers students and practitioners in the fields of Computer Science and Engineering **Proceedings of The 17th East Asian-Pacific Conference on Structural Engineering and Construction, 2022** Guoqing Geng,Xudong Qian,Leong Hien Poh,Sze Dai Pang,2023-03-13 This book presents articles from The 17th East Asian Pacific Conference on Structural Engineering and Construction 2022 organized by National University of Singapore These peer reviewed articles authored by professional engineers academics and researchers highlight the recent research and developments in structural engineering and construction embracing the theme Towards a Resilient and Sustainable City The papers presented in this proceeding provide in depth discussions with key insights into the future research development and engineering translation in structural engineering and construction Comprehensive Remote Sensing Shunlin Liang,2017-11-08 Comprehensive Remote Sensing Nine Volume Set covers all aspects of the topic with each volume edited by well known scientists and contributed to by frontier researchers It is a comprehensive resource that will benefit both students and researchers who want to further their understanding in this discipline The field of remote sensing has quadrupled in size in the past two decades and increasingly draws in individuals working in a diverse set of disciplines ranging from geographers oceanographers and meteorologists to physicists and computer scientists Researchers from a variety of backgrounds are now accessing remote sensing data

creating an urgent need for a one stop reference work that can comprehensively document the development of remote sensing from the basic principles modeling and practical algorithms to various applications Fully comprehensive coverage of this rapidly growing discipline giving readers a detailed overview of all aspects of Remote Sensing principles and applications Contains Layered content with each article beginning with the basics and then moving on to more complex concepts Ideal for advanced undergraduates and academic researchers Includes case studies that illustrate the practical application of remote sensing principles further enhancing understanding

The History of the GPU - Steps to Invention Jon Peddie,2023-01-01

This is the first book in a three part series that traces the development of the GPU Initially developed for games the GPU can now be found in cars supercomputers watches game consoles and more GPU concepts go back to the 1970s when computer graphics was developed for computer aided design of automobiles and airplanes Early computer graphics systems were adopted by the film industry and simulators for airplanes and high energy physics exploding nuclear bombs in computers instead of the atmosphere A GPU has an integrated transform and lighting engine but these were not available until the end of the 1990s Heroic and historic companies expanded the development and capabilities of the graphics controller in pursuit of the ultimate device a fully integrated self contained GPU Fifteen companies worked on building the first fully integrated GPU some succeeded in the console and Northbridge segments and Nvidia was the first to offer a fully integrated GPU for the PC Today the GPU can be found in every platform that involves a computer and a user interface
