Bureau of Secondary Education, 1962 **Plato's Sun** Andrew Lawless, 2005-12-15 Writing an introductory text for philosophy is an exceedingly difficult task The discipline has spent a century or more in existential crisis with the attack on metaphysics dating back at least to Nietzsche and carried forward in different ways by Heidegger Wittgenstein and Derrida to name a few This constant upheaval has precipitated a climate of self doubt that goes to the core of philosophy the result being a strange discipline with many of its most illustrious names proudly announcing its demise In Plato's Sun Andrew Lawless takes on the challenge of creating an introductory text for philosophy arguing that such a work has to take into account of the strangeness of the field and divulge it rather than suppress it beneath traditional certainties and authoritative pronouncements Lawless writes within the shadow of post modern anti metaphysical skepticism introducing some of the principal areas of philosophy metaphysics epistemology logic ethics and language Lawless's concern is not to resolve the issues he raises so much as to set them out in a way that lets the reader experience something of the philosopher's struggle In so doing Lawless holds fast to the Socratic vision of philosophy as a process of inquiry that values questions above answers pushing the inquirer beyond his or her answers With numerous pedagogical features including glossaries of names and key terms suggested readings and short chapter summaries Plato's Sun will be an essential text to new students of philosophy and an important aid in teaching the subject **Plato** Paul Friedlander, 2015-03-08 Contents I Eidos II Demon and Eros III Beyond Being IV The Academy V The Written Work VI Socrates in Plato VII Irony VIII Dialogue IX Myth X Intuition and Construction XI Aletheia XII Dialogue and Existence XIII Plato's Letters XIV Plato as Physicist XV

Ostlie,2022-09-07 Since humans first looked up at the stars astronomy has had a particular ability to stir the imagination and challenge the thinking of scientists and non scientists alike Astronomy The Human Quest for Understanding is an introductory astronomy textbook specifically designed to relate to non science majors across a wide variety of disciplines nurture their curiosity and develop vital science based critical thinking skills This textbook provides an introduction to how science operates in practice and what makes it so successful in uncovering nature s secrets Given that the study of astronomy dates back thousands of years it is the ideal subject for tracing the development of the physical sciences and how our evolving understanding of nature has influenced and been influenced by mathematics philosophy religion geography politics and more This historical approach also illustrates how wrong turns have been taken and how the inherent self correcting nature of science through constant verification and the falsifiability of truly scientific theories ultimately leads us back to a more productive path in our quest for understanding This approach also points out why as a broadly educated citizenry students of all disciplines must understand how scientists arrive at conclusions and how science and technology have become central features of modern society In discussing this fascinating and beautiful universe of which we are a part it is necessary to illustrate the fundamental role that mathematics plays in decoding nature s mysteries Unlike other similar textbooks some basic mathematics is integrated naturally into the text together with interpretive language and supplemented with numerous examples additional tutorials are provided on the book s companion website Astronomy The Human Quest for Understanding leads the reader down the path to our present day understanding of our Solar System stars galaxies and the beginning and evolution of our universe

Russell,2019-10-16 Originally published in 1994 The Earth Humanity and God discusses the relationship between science and religion The book discusses the condition of the earth as it was at the time of publication and the future prospects of the planet arguing that neither the conventional mechanistic view nor New Age philosophy helps alone in evaluating our relationship with the Earth The book examines methods of combatting the threats to the Earth exploring both a scientific and non scientific stance investigating the uncontrolled expansion of technology as well as empirical pre scientific mysticism The book also explores the resurgence in ancient ideas of Mother Earth as a dangerous piece of romantic irrationality and suggests that these views pose a danger to religious scientific examinations The book suggests instead a hard headed attempt to relate Biblical and scientific data and that this in turn can yield a valuable new understanding of the problems facing the world *Library of Universal Literature: Science (15 vols.)* ,1900 Modern Space Science Frederick E.
