## **Polo 2013 Manual:**

*Manual of Deixis in Romance Languages* Konstanze Jungbluth, Federica Da Milano, 2015-10-16 Deixis as a field of research has generated increased interest in recent years. It is crucial for a number of different subdisciplines: pragmatics, semantics, cognitive and contrastive linguistics, to name just a few. The subject is of particular interest to experts and students, philosophers, teachers, philologists and psychologists interested in the study of their language or in comparing linguistic structures. The different deictic structures not only the items themselves but also the oppositions between them reflect the fact that neither the notions of space, time, person nor our use of them are identical cross culturally. This diversity is not restricted to the difference between languages but also appears among related dialects and language varieties. This volume will provide an overview of the field focusing on Romance languages but also reaching beyond this perspective. Chapters on diachronic developments, language change, comparisons with other non-European languages and on interfaces with neighboring fields of interest are also included. The editors and authors hope that readers regardless of their familiarity with Romance languages will gain new insights into deixis in general and into the similarities and differences among deictic structures used in the languages of the world.

The Oxford Handbook of Suicide and Self-Injury Matthew K. Nock, 2014-05-08 Suicide is a perplexing human behavior that remains among the leading causes of death worldwide, responsible for more deaths each year than all wars, genocide and homicide combined. Although suicide and other forms of self-injury have baffled scholars and clinicians for thousands of years, the past few decades have brought significant leaps in our understanding of these behaviors. This volume provides a comprehensive summary of the most important and exciting advances in our understanding of suicide and self-injury and our ability to predict and prevent it. Comprised of a formidable who's who in the field, the handbook covers the full spectrum of topics in suicide and self-injury across the lifespan, including the classification of different self-injurious behaviors, epidemiology, assessment techniques and intervention. Chapters probe relevant issues in our society surrounding suicide, including assisted suicide and euthanasia, suicide terrorism, overlap between suicidal behavior and interpersonal violence, ethical considerations for suicide researchers, and current knowledge on survivors of suicide. The most comprehensive handbook on suicide and self-injury to date, this volume is a must-read text for graduate students, fellows, academic and research psychologists, and other researchers working in the brain and behavioral sciences.

**Handbook of Mental Health in African American Youth** Alfiee M. Breland-Noble,Cheryl S. Al-Mateen,Nirbhay N. Singh,2016-01-22 This handbook fills major gaps in the child and adolescent mental health literature by focusing on the unique challenges and resiliencies of African American youth It combines a cultural perspective on the needs of the population with best practice approaches to interventions Chapters provide expert insights into sociocultural factors that influence mental health the prevalence of particular disorders among African American adolescents ethnically salient assessment and diagnostic methods and the evidence base for specific models The information presented in this handbook helps bring the field closer to critical goals increasing access to treatment preventing misdiagnosis and over hospitalization and reducing and ending disparities in research and care Topics featured in this book include The epidemiology of mental disorders in African American youth Culturally relevant diagnosis and assessment of mental illness Uses of dialectical behavioral therapy and interpersonal therapy Community approaches to promoting positive mental health and psychosocial well being Culturally relevant psychopharmacology Future directions for the field The Handbook of Mental Health in African American Youth is a must have resource for researchers professors and graduate students as well as clinicians and related professionals in child and school psychology public health family studies child and adolescent psychiatry family medicine and social work     Handbook of Multicultural Mental Health Stanley J. Huey,Eduardo O. Jones,2013-07-19 This chapter reviews research on psychotherapy effects and treatment engagement for ethnically diverse youth and families Evidence supports several methods for increasing treatment engagement for ethnic minority youth and families including written and verbal prompts and targeting barriers to treatment attendance by phone or in person Over 30 efficacious interventions were identified for treating ethnic minority youth and families and the effect size magnitude was in the small to medium range However most of the evidence was found for Latino and African American youth with limited to no evidence supporting psychosocial treatments for Asian Native American or other non White youth Research evaluating ethnic differences in treatment effects was equivocal with most studies suggesting that White and non White youth benefit equally There was evidence supporting the efficacy of culturally tailored interventions over control groups but it is unclear whether cultural

tailoring enhances outcomes above and beyond generic treatment effects The chapter concludes with recommendations for improving psychosocial intervention research with diverse youth and families
