**Plato's Proto-Narratology** Vasileios Liotsakis, 2023-09-18 Plato's contribution to narratology has traditionally been traced in his tripartite categorisation of narrative modes we read of in the Republic Although other aspects of storytelling are also addressed throughout the Platonic oeuvre such passages are treated as instantaneous flares of metanarrative speculation on Plato's part and do not seem to contribute to the reconstruction of his theory of narrative Vasileios Liotsakis challenges this view and argues that the Statesman the Timaeus Critias and the Laws reveal that Plato had consolidated in his mind and compositionally put into effect one systematic mode in which to express his thoughts on narratives In these dialogues Liotsakis recognizes the birth of a proto narratology which differs in many respects from what we today expect from a narratological handbook but still demonstrates two key features of narratology a a conscious focus on certain aspects of narrativity which are vastly discussed by narratologists and pertain to the structuring and reception of narratives and b a schematised mode of interaction between metanarrative reflections and textual bodies which serve as the paradigms through which to explore the interpretive potential of these reflections

Applying Evolutionary Archaeology Michael J. O'Brien, R. Lee Lyman, 2007-05-08 Anthropology and by extension archaeology has had a long standing interest in evolution in one or several of its various guises Pick up any lengthy treatise on humankind written in the last quarter of the nineteenth century and the chances are good that the word evolution will appear somewhere in the text If for some reason the word itself is absent the odds are excellent that at least the concept of change over time will have a central role in the discussion After one of the preeminent and often vilified social scientists of the nineteenth century Herbert Spencer popularized the term in the 1850s evolution became more or less a household word

usually being used synonymously with change albeit change over extended periods of time Later through the writings of Edward Burnett Tylor Lewis Henry Morgan and others the notion of evolution as it applies to stages of social and political development assumed a prominent position in anthropological discussions To those with only a passing knowledge of American anthropology it often appears that evolutionism in the early twentieth century went into a decline at the hands of Franz Boas and those of similar outlook often termed particularists However it was not evolutionism that was under attack but rather comparativism an approach that used the ethnographic present as a key to understanding how and why past peoples lived the way they did Boas 1896
