Air Quality Monitoring and Advanced Bayesian Modeling Yongjie Li, Ka In Hoi, Kai Meng Mok, Ka Veng Yuen, 2023-01-14 Air Quality Monitoring and Advanced Bayesian Modeling introduces recent developments in urban air quality monitoring and forecasting. The book presents concepts, theories, and case studies related to monitoring methods of criteria air pollutants, advanced methods for real-time characterization of chemical composition of PM and VOCs, and emerging strategies for air quality monitoring. The book illustrates concepts and theories through case studies about the development of common statistical air quality forecasting models. Readers will also learn advanced topics such as the Bayesian model class selection, adaptive forecasting model development with Kalman filter, and the Bayesian model averaging of multiple adaptive forecasting models. Covers fundamental to advanced applications of urban air quality monitoring and forecasting. Includes detailed descriptions and applications of the instruments necessary for the most successful monitoring techniques. Presents case studies throughout to provide real-world context to the research presented in the book. *Physics of Semiconductor Devices* V. K. Jain, Abhishek Verma, 2013-11-27 The purpose of this workshop is to spread the vast amount of information available on semiconductor physics to every possible field throughout the scientific community. As a result, the latest findings, research, and discoveries can be quickly disseminated. This workshop provides all participating research groups with an excellent platform for interaction and collaboration with other members of their respective scientific community. This workshop's technical sessions include various current and significant topics for applications and scientific developments, including Optoelectronics, VLSI, ULSI Technology, Photovoltaics, MEMS, Sensors, Device Modeling, and Simulation, High-Frequency Power Devices, Nanotechnology, and Emerging Areas, Organic Electronics, Displays, and Lighting. Many eminent scientists from various national and international organizations are actively participating with their latest research works and also equally supporting this mega event by joining the various organizing committees. **Transactions of JWRI.** 卷四. 第1期, 2012 Advanced Textile Testing Techniques Sheraz Ahmad, Abher Rasheed, Ali Afzal, Faheem Ahmad, 2017-08-01 Textile testing is an important field of textile sciences involving experimental evaluation of conventional as well as technical textile products. This book aims to provide technical details, required protocols, and procedures for conducting any specific evaluation test along with key parameters. The book covers the topics in two main sections: first one for the conventional textile testing techniques starting from fiber to final product, while the second one focusses on testing of technical textiles. Written with a reader-friendly approach, it will cater to graduate students in textile engineering as well as industry personnel focusing on following key points. Addresses all techniques for testing both conventional and technical textiles. Describes testing techniques compliant with the latest requirements of the updated EN ISO and AATCC standards. Provides detailed description on the testing of technical textiles and their products. Discusses the operations conditions like atmospheric conditions and human error with cause and effect diagrams. Covers both destructive and non-destructive testing.
