*BBC annual report and accounts 2006-07* Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2008-01-22 A Culture Media and Sport Committee s oral evidence session on the BBC annual report and accounts 2006 07 was followed up with some written questions The Committee has concerns about the structure and content of the BBC reply to those questions In particular it is not clear why the BBC Trust takes different views on transparency of employee costs and on transparency of talent presenters or actors etc costs and why grouping of payments in bands for one but not the other presents data protection or breach of confidence issues The Committee also questions why viewing figures for BBC3 are given in three minute reach figures rather than the standard 15 minute reach used throughout the annual report and why the BBC3 figures excluding repeats of BB1 programmes were not provided On Freesat a joint venture to provide a national satellite based free to view digital service the failure to disclose the contribution of the licence fee payer is held to be unreasonable The Committee would like greater clarity about who speaks for the BBC the Trust or Executive Future responses should make clear where accountability lies for particular issues and the BBC should take a more constructive approach to responding to Parliamentary scrutiny

*U.S. Geological Survey Bulletin*, 1983 **Protecting Europe against large-scale cyber attacks** Great Britain: Parliament: House of Lords: European Union

Committee, 2010-03-18 The issue of large scale cyber attacks on the internet has moved up the international agenda recently This inquiry looks at how States and their major organisations can defend themselves and their critical information infrastructures CIIs against such attacks Whilst individual States bear primary responsibility for their critical national infrastructure CNI the infrastructures are heavily interdependent The Internet is a global network of networks and individual States cannot be viewed in isolation The Committee therefore concludes that continuing intervention at EU level was appropriate and that all Member States have an interest in bringing the defences of the least protected up The Committee

also looked at ENISA the European Network and Information Security Agency and they believe that with a widening of its mandate it can play a more significant part in the developments envisaged Scientific and Technical Aerospace Reports ,1982 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **Government Reports Annual Index** ,1991 Monthly Catalog of United States Government Publications United States. geologists rock mechanics experts as well as geotechnical and petroleum engineers That is because this book is concerned with what is probably the most peculiar characteristic of rock its initial stress condition Rock is always under a natural state of stress primarily a result of the gravitational and tectonic forces to which it is subjected Crustal stresses can vary regionally and locally and can reach in places considerable magnitudes leading to natural or man made mechanical failure Pre existing stress distinguishes rock from most other materials and is at the core of the discipline of Rock Mechanics which has been developed over the last century Knowledge of rock stress is fundamental to understanding faulting mechanisms and earthquake triggering to designing stable underground caverns and productive oil fields and to improving mining methods and geothermal energy extraction among others Several books have been written on the subject but none has attempted to be as all encompassing as the one by Zang and Stephansson
