Virtual Justice H. Richard Uviller, 2008-10-01 Sensational trials obsessively televised and reported by news media have led many Americans to question the effectiveness of their criminal justice system Do police have the laws they need or the competence to do their job Can juries recognize the truth in the tangle of evidence presented to them What do lawyers actually contribute to the quest for justice in the criminal court In this fascinating book a distinguished legal authority examines the flaws contradictions and weaknesses in our American justice system The gripping stories he tells about the investigation and trial of criminal cases reveal what s really going on and demonstrate how the system often fails to deliver true justice H Richard Uviller deftly covers major aspects of the criminal justice process from the gathering of evidence capture and custody and eyewitness identification to plea bargaining selecting the jury and the role of the judge He illuminates each aspect of the process by creating and then analyzing a scenario drawn from the daily business of the courtrooms of the nation a scenario in which police or judges may find themselves frustrated or immobilized often by the law itself Uviller explains the legal quandaries that often bedevil the process and shows how decisions by the Supreme Court have relieved or aggravated perplexity He concludes that the prohibitions limiting investigation the pervasive combat mentality between defense and prosecution lawyers and in particular the power vested in a random collection of ordinary people gathered together as a jury all contribute to a criminal justice system that produces virtual rather than actual justice

Architecture and Justice Jonathan Simon, 2016-04-15 Bringing together leading scholars in the fields of criminology international law philosophy and architectural history and theory this book examines the interrelationships between architecture and justice highlighting the provocative and curiously ambiguous juncture between the two Illustrated by a range of disparate and diverse case studies it draws out the formal language of justice and extends the effects that architecture has on both the place of and the individuals subject to justice With its multi

disciplinary perspective the study serves as a platform on which to debate the relationships between the ceremonial legalistic administrative and penal aspects of justice and the spaces that constitute their settings The structure of the book develops from the particular to the universal from local situations to the larger city and thereby examines the role that architecture and urban space play in the deliberations of justice At the same time contributors to the volume remind us of the potential impact the built environment can have in undermining the proper juridical processes of a socio political system Hence the book provides both wise counsel and warnings of the role of public civic space in affirming our sense of a just or unjust society

Access to Justice and Legal Aid Asher Flynn, Jacqueline Hodgson, 2017-01-26 This book considers how access to justice is affected by restrictions to legal aid budgets and increasingly prescriptive service guidelines As common law jurisdictions England and Wales and Australia share similar ideals policies and practices but they differ in aspects of their legal and political culture in the nature of the communities they serve and in their approaches to providing access to justice These jurisdictions thus provide us with different perspectives on what constitutes justice and how we might seek to overcome the burgeoning crisis in unmet legal need The book fills an important gap in existing scholarship as the first to bring together new empirical and theoretical knowledge examining different responses to legal aid crises both in the domestic and comparative contexts across criminal civil and family law It achieves this by examining the broader social political legal health and welfare impacts of legal aid cuts and prescriptive service guidelines Across both jurisdictions this work suggests that it is the most vulnerable groups who lose out in the way the law now operates in the twenty first century This book is essential reading for academics students practitioners and policymakers interested in criminal and civil justice access to justice the provision of legal assistance and legal aid

From governments, employers and prospective students and their parents, the stakeholders in the higher education system are now extremely varied, paying close attention to the various aspects of higher education from infrastructure on campus safety and security to administration, faculty and curricula. The present

series attempts to take into account the issues of importance to all the stakeholders Hence the series not only pays attention to the purpose and outcomes of higher education but also the economics surrounding higher education vis a vis marketization The nitty gritty of running and maintaining a university infrastructure impact of globalization and internationalization on delivery and demand of higher education the commoditization of research and changing paradigms of teaching and learning fall within the purview of the series The increasing competition from other entities to provide degrees certificates or other forms of credentials makes it important to have a work that brings all of the elements together to see how they actually interact and inter relate from a systems perspective The present series attempts to comprehensively attend to these issues and provide a complete reference resource to all those involved and interested in setting up of a Higher Education institution and its administration
