

Vivitar 100mm f3.5 Macro

ENGLISH

Instructions

Thank you for purchasing this lens. Its 100mm focal length is perfect not only for macro, but also for portrait work. Compared to a 50mm lens, you can get farther away from your subject, an advantage for both macro and portraits. With its deeply recessed front element, there is no need for a lens hood. For macrophotography, it is also ideal for use with the Vivitar Ring Flash. Please read these instructions carefully before use to fully enjoy your SLR photography.

6. Aperture Ring

Auto Focusing (AF Model)

Set your camera to AF (auto focusing) mode. (If your lens is for EOS models, set the AF/M Selector to the AF position.) As the Focusing Ring rotates automatically in this mode, never disturb this operation. The lens aperture is set automatically by the camera.

CAUTION: Never rotate the Focusing Ring forcibly with the auto focus mode On (if your lens is for EOS, with the AF/M Selector set on AF). Otherwise, damage may occur.

Manual Focusing

AF Model

Set your camera to Manual focusing mode. (If your lens is for EOS models, set the AF/M Selector to the M position.) Turn the Focusing Ring while viewing your subject through the viewfinder. The lens aperture is set automatically by the camera.

MF Model

Operate the focusing and aperture rings as you would for your standard lens. You can use the Depth of Field Lines to estimate the zone of sharpness in front of and behind the subject at f/22 (green lines) and f/8 (blue/red lines).

Infrared Photos

In manual mode you can take pictures with infrared film. To compensate for the shift in infrared focus, focus normally, read the subject's distance from the distance scale, and move the focusing ring slightly to align that distance with the infrared index line.

Magnification

There are two maximum magnification ratios: 1:2, shown in yellow, for normal photography, and 1:1, shown in red, for macro photography with the exclusive macro adapter. As magnification goes up, small camera movements can cause blurry pictures. Be sure to mount the camera on a tripod.

NOTE: With the macro adapter mounted, it is not possible to focus the lens at infinity.
