Chand,Mike Gold,2002-04-17 A Programmer's Guide to ADO.NET in C# begins by taking readers through a fast paced overview of C# and then delves into ADO.NET. Why should C# programmers use it instead of the existing technologies? What new functionality does it offer? The chapters that follow go through the details on each of the major Data Providers of the .NET platform: OleDb, SQL Server, and ODBC, that enable you to read and write data to the targeted database. These chapters also serve as a good reference for looking up detailed methods and properties for these data provider classes. Authors Chand and Gold also show C# programmers how to work with XML classes and how to integrate XML into the ADO.NET architecture. The book provides programmers with handy ideas about taking advantage of the VS.NET IDE and how you can tie your data to the myriad of powerful controls including the multi-faceted Data Grid. Finally, it goes through creating a guest book application for the Web so you can see how all the pieces fit together.

A User's Guide to the Technical Training

Schoolhouse Model Thomas Manacapilli,Bart Bennett,2006 In 2002 RAND Project AIR FORCE studied the data systems used by the Air Education and Training Command AETC to manage training costs and capacities. The schoolhouse model developed to inform policy decisions regarding technical training pipeline issues grew out of this study. The model examines resources used and training limitations encountered during the execution of a training program. At the same time the AETC Studies and Analysis Squadron SAS built a similar set of planning and execution assessment tools. RAND and AETC SAS agreed to combine the schoolhouse portion of their efforts into one model. The purpose of this report is to provide front end users of the schoolhouse model with a reference for collecting and implementing data. It also briefly describes the simulation model and its uses. The model is potentially useful for evaluating changes in production and resources highlighting resource bottlenecks providing insight into classroom details such as empty seats and the rate of individuals who prove ineffective in training and changes in production resulting from changes in resources course syllabi and washback and attrition rates.
