Incentives, Regulations and Plans Gerrit Knaap, 2007-01-01 The book will be useful to planners engaged in smart growth efforts on both sides of the Atlantic Its strength is in the inclusion of a variety of topics and case studies relevant to growth management programs and highlighting key direct and indirect impacts of these efforts in a variety of contexts Lucie Laurian Growth and Change This unique book allows readers to compare analyses of how North American states and European nation states use incentives regulations or plans to approach a core set of universal land use issues such as containing sprawl mixed use development transit oriented development affordable housing healthy urban designs and marketing smarter

growth The concept of smart growth has gained in popularity in many countries around the world From Europe to Asia to North America planners citizens and policy makers have come to realize that patterns of urban development not only matter but can affect the quality of life of every urban and rural resident Comparing the approaches and results of policies in different locations is a logical way to assess policy success While similarities and differences provide the foundation for trans Atlantic comparisons the contributions in this book focus on three central themes smart growth the role of states and nation states and the use of incentives regulations and plans Incentives Regulations and Plans will find an audience in the United States Canada and Europe especially from those interested in architecture planning engineering urban studies agriculture and public policy

**Industrial Agglomeration and New Technologies** Masatsugu Tsuji, Emanuele Giovannetti, Mitsuhiro Kagami, 2007 the book is an interesting collection of anecdotal evidence the book makes for interesting reading both from the point of view of case studies and in terms of empirical methodological applications Silvia Grandi Economic Geography Research Group This is a valuable book The individual chapters contain original case study evidence and analytical insights it is one that should be consulted by any scholar working in the area of industrial agglomerations and new technology Simona Iammarino Economic Geography This book a collaborative effort by researchers from Japan Italy and the USA seeks to explore the reasons for industrial clustering in certain regions of Asia Europe and North America The studies presented illustrate real examples of industrial clusters adding anecdotal evidence to the emerging theory of economic geography by exemplifying the centripetal and centrifugal forces that regulate the clustering process The authors examine clusters in a diverse set of countries including China Italy Japan Mexico South Korea the USA and Vietnam Significantly the book provides an interesting split between studies of IT and software related industries and more traditional sectors such as steel and vehicle manufacturing Industrial Agglomeration and New Technologies pays attention to a varied array of factors that influence clustering such as knowledge spillovers tacit knowledge communication and transport costs and the effects of various government policies The case studies provide useful examples for government and industry leaders as well as a starting point for researchers seeking an ultimate answer to the question Why do firms form clusters

*Spatial Dynamics, Networks and Modelling* Reggiani, A. Nijkamp, P., 2006 the editors have done an excellent job in bringing together a comprehensive collection of cutting edge research findings on network theory Sierdjan Koster European Spatial Research and Policy

**Smart Cities and the Poor** Alok Mishra, 2023-10-20 Developing countries worldwide have been embarking on smart cities programmes using new technology solutions to improve public services Faced with severe problems of digital divide poverty unemployment inequality and financial and social exclusion these cities have to negotiate hard in order to reach their goals This book examines urban governance digital divide poverty unemployment and financial and social exclusion and presents a theoretical perspective on inclusive cities urbanization migration slums and affordable housing The book aims at formulating and implementing an agenda for inclusive equitable and sustainable urban development in tune

with the UN SDGs the New Urban Agenda of Habitat III and India's new national urban missions. It probes into the scope of adopting inclusionary urban planning zoning and housing financing inclusive city development and poverty alleviation through municipal finance reforms using findings and lessons from detailed field studies of Indian cities. It also suggests an agenda for slum free and poverty free cities in an attempt to make these cities more people focused humane and inclusionary. This book will be of interest to scholars and researchers of political science policy studies public administration urban studies urban planning and management urban sociology and geography besides being of interest to policy researchers community workers grass roots researchers policymakers and sociologists. Intra-regional economic integration Nicole

Litzel, 2015-02-17 Die Wettbewerbsfähigkeit von Betrieben hängt aufgrund ihrer möglichen Einbettung in die regionalen Wirtschaftsstrukturen auch von den lokalen Bedingungen ab. Deswegen stehen Wirtschaftscluster bereits seit geraumer Zeit im Fokus der regionalökonomischen Forschung und der regionalen Wirtschaftspolitik. Wie können regionale Cluster identifiziert werden? Welche Rolle spielen Cluster im internationalen Standortwettbewerb? Von welchen Faktoren hängt die Kooperation zwischen Betrieben innerhalb eines Clusters ab? Und welche Auswirkungen auf Überlebenswahrscheinlichkeit und Beschäftigtenwachstum hat es, wenn sich Betriebe in Clustern positionieren? Diesen und anderen Fragen geht Nicole Litzel gestützt auf Daten aus dem regionalen Informationssystem CORIS am Beispiel der Wirtschaftsregionen Nürnberg und Ostbayern nach. The Geography of the Internet Emmanouil Tranos, 2013-01-01

This timely book presents a wide range of quantitative methods including complex network analysis and econometric modelling to illustrate how the Internet both follows and at the same time challenges more traditional geographies. Emmanouil Tranos explores the spatiality of the Internet: its physical infrastructure and the geographic and socioeconomic factors that shape its spatial distribution. He shows that although the Internet is a technical system with strong topological attributes, an almost hidden spatial dimension also exists. The scattering of Internet Backbone Networks across European city regions is compared with the aviation network in order to better understand the topology of the digital infrastructure. Finally, a causality analysis demonstrates the significant positive effect of the Internet infrastructure in the economic development of regions characterized by high absorptive capacity. This book will prove a highly fascinating read for those with an interest in Internet geographies, ICTs, regional development and infrastructure, digital economy, network analysis and regional science. Practitioners working on local and regional development as well as those focusing on ICTs, digital economy and smart cities will also find this book to be an invaluable reference tool. **Social Capital and Rural Development in the Knowledge Society** Hans

Westlund, Kiyoshi Kobayashi, 2013-01-01 This book by Westlund and Kobayashi emphasises the fact that the gap between urban and rural areas is no longer relevant today: all places and regions are under a strong influence from cities. The authors show in a straightforward way that the continuum between more and less urbanized places requires new types of regulations based on innovation and local skills and that rural policies cannot be based on agriculture only but primarily require the

mobilization of local social capital links Andr Torre INRA Agroparistech Paris France Rural communities are not all resource dependent and very low density places Not all have people leaving in droves and no newcomers This book s theoretical arguments and case studies from five countries help one understand better the diversity of rural We find population gainers population losers newcomers and long term stayers together in sizable towns Aboriginal communities where out migration is limited The diversity is a key dimension in the analyses of public and private action to build and maintain social capital Roger E Bolton Williams College US This amazingly surprising book takes the popular topic of social capital and provocatively examines the contemporary rural development issue New social capital driven thinking and insights are applied globally from a conceptual frame and locally with examples The way forward for both urban and rural development is achieved when the variables that define social capital are simultaneously balanced around focused development objectives Examples show how a multidimensional view of social capital enables meaningful rural development Roger R Stough George Mason University US Social capital is often considered a key factor for local development This book analyzes the role of social capital for rural areas survival and development in the current age of metropolitan growth an era in which urban is the norm and where rural areas must adapt to this new situation and build innovative urban rural relations The traditional division between rural and urban is no longer valid in the knowledge society Instead of being a homogeneous unit based on primary sector production the countryside in the developed world increasingly consists of areas with very different development paths With examples from Europe Asia and America the book discusses building and renewal of rural social capital from both bottom up and top down perspectives and from the standpoint of business and both the public and private sectors Being the first book to treat social capital and rural development in the age of megacities and the knowledge economy it will be of great benefit to academics interested in social capital research and rural development

#### **Migration Impact Assessment**

Peter Nijkamp, Jacques Poot, Mediha Sahin, 2012-01-01 This book examines migration in a rapidly globalizing economy where it disrupts such relatively stable patterns as the trip to work home school and shopping on the one hand and is itself transformed by continuously evolving information and telecommunications technology declining relative transport cost and immigration policy dynamics The perspective is global yet provides the reader with empirically based work representing Europe North America and Asia and international comparative studies of changing migration patterns impact on trade and culture Roger R Stough George Mason University US During the last few decades the world has experienced an unprecedented level of cross border migration While this has generated significant socio economic gains for host countries as well as sometimes for the countries of origin the costs and benefits involved are unevenly distributed Consequently growing global population mobility is a hotly debated topic both in the political arena and by the general public Amidst a plethora of facts opinions and emotions the assessment of migration impacts must be grounded in a solid scientific evidence base This analytical book outlines and applies a range of the scientific methods that are currently available in migration impact

assessment MIA The book provides various North American and European case studies that quantify socio economic consequences of migration for host societies and for immigrants themselves With up to date and broad coverage this detailed study will appeal to academic researchers in the social sciences policy analysts at national and international level as well as graduate students in economics and regional science

**Entrepreneurship, Social Capital and Governance** Charlie Karlsson, Börje Johansson, Roger Stough, 2012-01-01 This book highlights the role of entrepreneurship social capital and governance for regional economic development In recent decades many researchers have claimed that entrepreneurship is the most critical factor in sustaining regional economic growth However most entrepreneurship research is undertaken without considering the fundamental importance of the regional context Other research has emphasized the role of social capital but there are substantial problems in empirically relating measures of social capital to regional economic development The expert contributors to this work highlight the role of governance in regional growth an area that has so far been relatively under researched underpinning their findings with new theoretical and empirical evidence They conclude that the relationship between entrepreneurship social capital and governance in factors affecting regional economic development are complex and interdependent and that to influence these factors and the relationship between them policymakers must have a long term perspective and be both patient and persistent in their efforts This enlightening book will be of great interest to academics students and researchers across a range of fields including regional science regional economics economic geography regional planning public policy entrepreneurship political science and economic sociology Policymakers involved in regional policymaking from national down to regional and local levels will also find the book to be an illuminating read

**Geographies of Growth** Charlie Karlsson, Martin Andersson, Lina Bjerke, 2017-06-30 Today we can observe an increasing spatial divide as some large urban regions and many more medium sized and small regions face growing problems such as decreasing labour demand increasing unemployment and an ageing population In view of these trends this book offers a better understanding of the general characteristics and specific drivers of the geographies of growth It shows how these may vary in different spatial contexts how hurdles and barriers to growth in different types of regions can be dealt with how and to what extent resources in different areas can develop and how the potential of these resources to stimulate growth can be realized

*Handbook of Research on Cluster Theory* Charlie Karlsson, 2010-01-01 Karlsson has assembled a strong mix of papers that collectively provide a good sense of some of the latest research in the field Edward Feser Review of Regional Studies This is a book every regional scientist and spatial analyst should have on their bookshelf Like most Handbook type publications it provides depth and breadth on the basics of the industrial clustering concept However unlike most of these type of collections it goes beyond the foundation material to identify and speculate on questions that are emerging on the research frontiers such as at the intersection of cluster theory and agglomeration processes knowledge spillovers and technology transfer not to mention the obvious link to economic development theory policy and practice Roger

R Stough George Mason University US This eclectic volume presents a host of methods to describe tendencies for the joint location of economic agents in space And it illustrates useful applications of these concepts in diverse fields financial services culture tourism and industry to name just a few John M Quigley University of California US Clusters have increasingly dominated local and regional development policies in recent decades and the growing intellectual and political interest for clusters and clustering is the prime motivation for this Handbook Charlie Karlsson unites leading experts to present a thorough overview of economic cluster research Topics explored include agglomeration and cluster theory methods for analysing clusters clustering in different spatial contexts and clustering in service industries Encompassing the developed economies of Europe and North America the Handbook provides a basis for improving cluster policy formulation interpretation and analyses This comprehensive overview of research on economic clusters will be of interest to scholars and PhD students in regional economics economic geography regional planning and management as well as practitioners and policymakers at the national regional and local levels involved in cluster formation and cluster management

**World Development Report 2009** World Bank,2008-11-04 Rising densities of human settlements migration and transport to reduce distances to market and specialization and trade facilitated by fewer international divisions are central to economic development The transformations along these three dimensions density distance and division are most noticeable in North America Western Europe and Japan but countries in Asia and Eastern Europe are changing in ways similar in scope and speed World Development Report 2009 Reshaping Economic Geography concludes that these spatial transformations are essential and should be encouraged The conclusion is not without controversy Slum dwellers now number a billion but the rush to cities continues Globalization is believed to benefit many but not the billion people living in lagging areas of developing nations High poverty and mortality persist among the world s bottom billion while others grow wealthier and live longer lives Concern for these three billion often comes with the prescription that growth must be made spatially balanced The WDR has a different message economic growth is seldom balanced and efforts to spread it out prematurely will jeopardize progress The Report documents how production becomes more concentrated spatially as economies grow proposes economic integration as the principle for promoting successful spatial transformations revisits the debates on urbanization territorial development and regional integration and shows how today s developers can reshape economic geography

The Top Books of the Year Urban And Regional Economics By Philip Mccann Full The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Urban And Regional Economics By Philip Mccann Full : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting.
