Chicago Daniel R. Block, Howard B. Rosing, 2015-09-03 Chicago began as a frontier town on the edge of white settlement and as the product of removal of culturally rich and diverse indigenous populations The town grew into a place of speculation with the planned building of the Illinois and Michigan canal a boomtown and finally a mature city of immigrants from both overseas and elsewhere in the US In this environment cultures mixed first at the taverns around Wolf Point where the forks of the Chicago River join and later at the jazz and other clubs along the Stroll in the black belt and in the storefront ethnic restaurants of today Chicago was the place where the transcontinental railroads from the West and the trunk roads from the East met Many downtown restaurants catered specifically to passengers transferring from train to train between one of the five major downtown railroad stations This also led to destination restaurants where Hollywood stars and their onlookers would dine during overnight layovers between trains At the same time Chicago became the candy capital of the US and a leading city for national conventions catering to the many participants looking for a great steak and atmosphere Beyond hosting conventions and commerce Chicagoans also simply needed to eat safely and relatively cheaply Chicago grew amazingly fast becoming the second largest city in the US in 1890 Chicago itself and its immediate surrounding area was also the site of agriculture both producing food for the city and for shipment elsewhere Within the city industrial food manufacturers prospered highlighted by the meat processors at the Chicago stockyards but also including candy makers such as Brach's and Curtiss and companies such as Kraft Foods At the same time large markets for local consumption emerged The food biography of Chicago is a story of not just culture economics and innovation but also a history of regulation and regulators as they protected Chicago's food supply and built Chicago into a city where people not only come to eat but where locals rely on the availability of safe food and water With vivid details and stories of local restaurants and food Block and Rosing reveal Chicago to be one of the foremost eating destinations in the country

Spaces for Consumption Steven Miles,2010-08-01 In *Spaces for Consumption* Steven Miles develops a penetrating critique of a key shift characterising the contemporary city Theoretically informed the other strength of the volume lies in the wealth of examples that are drawn upon to show how cities are becoming spaces for consumption which has itself rapidly become a global phenomenon Ronan Paddison University of Glasgow This is a great book Powerfully written and lucid it provides a thorough introduction to concepts of consumption as they relate to the spaces of cities The spaces themselves the airports the shopping malls the museums and cultural quarters are analysed in marvellous detail and with a keen sense of

historical precedent And refreshingly Miles doesn't simply dismiss cultures of consumption out of hand but shows how as consumers we are complicit in and help define those cultures His book makes a major contribution to our understanding of contemporary cities but is accessible enough to appeal to any reader with an interest in this important area Richard Williams Edinburgh University Spaces for Consumption offers an in depth and sophisticated analysis of the processes that underpin the commodification of the city and explains the physical manifestation of consumerism as a way of life Engaging directly with the social economic and cultural processes that have resulted in our cities being defined through consumption this vibrant book clearly demonstrates the ways in which consumption has come to play a key role in the re invention of the post industrial city The book provides a critical understanding of how consumption redefines the consumers relationship to place using empirical examples and case studies to bring the issues to life It discusses many of the key spaces and arenas in which this redefinition occurs including shopping themed space mega events architecture Developing the notion of contrived communality Steven Miles outlines the ways in which consumption alongside the emergence of an increasingly individualized society constructs a new kind of relationship with the public realm Clear sophisticated and dynamic this book will be essential reading for students and researchers alike in sociology human geography architecture planning marketing leisure and tourism cultural studies and urban studies
