approach demonstrates how international cultural heritage law affords a particularly strict meaning to military necessity. As a result, the relative waiver will only be available to belligerents very rarely in truly extraordinary circumstances. Drazewska's *Military Necessity in International Cultural Heritage Law* engages a significant issue in this rapidly evolving field of international law: the inclusion of necessity in regulation of the protection of cultural heritage during armed conflict after 1945. Its very inclusion was viewed as a major concession which is only multiplied because of the difficulties of its application on the ground. This thorny issue has come to the fore again with large scale cultural losses inflicted during recent armed conflicts. Elegantly written and scholarly in its approach, this book places this question and possible answers to it within the broader sweep of international law and recent developments not only in international humanitarian law but state responsibility, international criminal law and international criminal law. It offers a significant and timely reexamination and reconceptualization of this important topic.
